

CONTENTS

	<i>Preface</i>	<i>xvii</i>
1	NATURE AND SCOPE OF BIO DIVERSITY	1
1.1	Meaning	1
1.2	Functions of Bio Diversity	2
1.3	Biodiversity: Species and Composition	2
1.4	Ecosystem Responses to Changes in Biodiversity	4
1.5	Biodiversity and Levels of Ecosystem Functioning	5
1.6	Biodiversity and Ecosystem Stability	7
1.7	Affiliated Ecosystems in Biodiversity	9
1.8	Biodiversity Providing Lessons for Scientists in Engineering	9
1.9	Economics and Biodiversity	9
1.10	Importance of Biodiversity	10
1.11	The Value of Biological Diversity's Components	11
1.12	Contribution to Climate Stability	12
1.13	Role of Biodiversity in Recovery from Unpredictable Events	13
1.14	Role of Biodiversity in Protection of Life Support System	16
2	PLANT-ANIMAL INTERACTION IN BIODIVERSITY CONSERVATION	20
2.1	Need for Plant - Animal Interaction	20
2.2	Improving Biodiversity thorough Pollination of Plants	21
2.3	Possible Pressures on Pollinators	22
2.4	Seed and Seedling Predators	23
2.5	Forest Fragmentation Management	25
2.6	Place of Animal - Plant Interactions in Forest Conservation	25
2.7	Reforestation through Plant - Animal Interactions	25
2.8	Pollination in Animal - Plant Interactions	26
2.9	Role of Herbivory in Reforestation	27
2.10	Biodiversity Conservation via Dispersal	28
2.11	Understanding Challenges in Animal Plant Interactions	29

- 2.12 Pollination in Propagation of Biodiversity
- 2.13 Biocontrol in Protection of Biodiversity
- 2.14 Agricultural Management and Soil Microbial Communities
- 2.15 Role of Earthworms in Protection of Soil Biodiversity
- 2.16 Soil Fertility Enhancement and Soil Biodiversity Protection
- 2.17 Seed Dispersal and Human Development
- 2.18 Fungivores Role in Biodiversity Conservation
- 2.19 Conservation of Natural Enemies in Protection of Biodiversity
- 2.20 Effects on Biological Control in Biodiversity Protection

3 AGRICULTURAL BIODIVERSITY

- 3.1 Meaning of Agricultural Biodiversity
- 3.2 Status in Agricultural Biodiversity
- 3.3 Underlying Causes of Agricultural Biodiversity Losses
- 3.4 Food Crops and Biodiversity
- 3.5 Agriculture and Genetic Diversity
- 3.6 Genetic Diversity and Livestock Breeding
- 3.7 Genetic Improvement of Forest Species
- 3.8 Risks of High - Yielding Crop Varieties
- 3.9 The External Costs of Biodiversity Loss in Agroecosystem
- 3.10 Habitat Conversion and Degradation
- 3.11 Soil Biodiversity
- 3.12 Human Practices and Soil Biodiversity
- 3.13 Role and Functions of Soil Organisms
- 3.14 Determination of Soil Biodiversity
- 3.15 Indicators of Soil Biodiversity

4 MARINE BIODIVERSITY

- 4.1 Introduction
- 4.2 The Various Zones of the Marine Biome
- 4.3 The Plants of the Marine Biome
- 4.4 Ocean Facts
- 4.5 Deepest Part of the Ocean - Challenger Deep in Mariana Trench
- 4.6 Ocean Food Chain
- 4.7 Ocean Food Web
- 4.8 Primary Consumers
- 4.9 Secondary Consumers
- 4.10 Decomposers
- 4.11 Bioeconomics of Marine Reserve
- 4.12 Potential Benefits of Reserves
- 4.13 Bioeconomics of Marine Reserves

30	4.14	Uncertainty and Stochastic Models	61
31	4.15	Implications for Fisheries Management	62
32	4.16	Impact of Marine Micro organisms on Marine Life	63
32	4.17	Micro - organism's Role in Decomposition	65
33	4.18	Oxidation of Hydrocarbons	67
34	4.19	Fouling	67
34	4.20	Biocontrol of Fouling Organisms	68
35	4.21	Marine Microbes Form a Major Component of the Plankton	68
35	4.22	Microbes Colonize Surfaces through Formation of Biofilms	72
39	4.23	Living on the Edge — An Insight into Extraterrestrial Life	73
39	4.24	Microbes in Sea Ice Form an Important Part of the Food Chain in Polar Regions	74
40	4.25	Cold Seeps also Support Diverse Life	76
41	4.26	Living Organisms are the Habitats of Many Microbes	77
42	4.27	Bio Economics of Coastal Estuaries	78
44	4.28	Classifying Ecosystem Goods and Services Provided by Estuaries	78
45	4.29	Future Research Needs	84
45	5	INDIAN BIODIVERSITY	87
46	5.1	Introduction	87
47	5.2	Bioresources in India	88
47	5.3	Biodiversity Distribution in India	90
48	5.4	Endemic Species in India	91
50	5.5	Threatened Species in India	92
51	5.6	Protected Areas of the Western Ghats	94
51	5.7	International Programmes and Conventions Adaptation in India	94
52	5.8	Coastal and Marine Biodiversity of India	95
52	5.9	Marine Algae	97
52	5.10	Mangroves	98
53	5.11	Threats to Coastal and Marine Biodiversity	106
53	6	BIODIVERSITY AND FOOD SECURITY	108
54	6.1	Introduction	108
54	6.2	Genetic Erosion in Agriculture	109
55	6.3	Importance of Agricultural Genetic Resources	109
56	6.4	Genetic Inter - dependence in Agriculture	111
57	6.5	Farmers as Innovators and Conservers of Diversity	111
57	6.6	Food Security and Wild Genetic Resources	112
57	6.7	Biodiversity and Indigenous Knowledge	112
58	6.8	Dangers of Genetic Uniformity	114
60	6.9	Importance of Crop Genetic Diversity	115

6.10	Farmer - Led Food Security	116
6.11	Conserving Domestic Animal Diversity	117
6.12	Forests in Food and Livelihood Security	118
6.13	World Forest Decline	120
6.14	Aquatic Harvest	123
6.15	Importance of Fisheries	123
6.16	Soil Biodiversity	125
6.17	The Value of Microbial Genetic Resources	127
7	BIODIVERSITY ECOSYSTEM SERVICES IN AGRICULTURE	128
7.1	Introduction	128
7.2	Sustainability Issues in Biodiversity	128
7.3	External Costs of Biodiversity	129
7.4	Biodiversity Ecosystem Services	131
7.5	Economic and Social Values	132
7.6	Soil Micro - Organisms, Invertebrates and Fungi	133
7.7	Ecosystem Services to Agriculture	133
7.8	Economic and Social Values	134
8	BIODIVERSITY AND HUMAN WELFARE	139
8.1	Introduction	139
8.2	Valuing Biodiversity	140
8.3	Welfare Values for Biodiversity	142
8.4	Biodiversity and Public Health	143
8.5	Importance of Biodiversity towards Healthy Ecosystems	144
8.6	Biodiversity, Food Quality and Dietary Health	145
8.7	Biodiversity and Water	146
8.8	Sustainability and External Costs in Biodiversity	147
8.9	Biodiversity Ecosystem Services	148
8.10	Economic and Social Values of Biodiversity	148
9	ECONOMIC GROWTH AND BIODIVERSITY	150
9.1	Introduction	150
9.2	Biodiversity Measures and Development Processes	150
9.3	Preventing Biodiversity Loss	151
9.4	Economic Aspects of Biodiversity	153
9.5	The Concept of Natural Capital	154
9.6	On the Substitutability between Natural Capital and Man made Capital	154
9.7	Biodiversity and Protected Areas	156
10	THE SOCIO-ECONOMIC COST OF BIODIVERSITY LOSS	159
10.1	Species Extinction	159

10.2	Role of Biodiversity in Ecosystem Service	160
10.3	Dangers of the 'economistic' Trend in Conservation	163
10.4	Biological Causes of Biodiversity Loss	164
10.5	Demographic Change and Biodiversity Loss	166
10.6	Production, Consumption, Inequality and Poverty	168
10.7	Public Policies at the National Level	169
10.8	Rapid Loss of Natural Landscape	170
10.9	Macroeconomic Policies and Structures in Biodiversity Loss	171
10.10	Culture, Social Change and Development Bias towards Biodiversity	172
10.11	Declining Ocean Biodiversity	175
10.12	Sustainable Forests	176
10.13	Long Term Costs of Biodiversity Extinction	177
10.14	Gymnosperms	181
10.15	Species with Poor Dispersal and Colonization Ability	183
10.16	Species with Little Evolutionary Experience with Disturbances	183
10.17	Biodiversity Loss: Cascade Effects	183
10.18	Mass Extinction Rates	187
10.19	Biodiversity Threat	189
10.20	Biotic Impoverishment	190
10.21	Protecting Biological Diversity	191
10.22	Important Findings	194
10.23	Current Trends in Biodiversity	195
11	TRENDS IN BIODIVERSITY EXPLOITATION	200
11.1	Introduction	200
11.2	Crop plants and their Relatives	200
11.3	Agriculture's Vanishing Heritage	201
11.4	Dangers of Genetic Uniformity	202
11.5	Geopolitics of Plant Genetic Resources	203
11.6	Promoting the Use and Conservation of Plant Genetic Resources	204
11.7	Domesticated and Related Animals	204
11.8	Value of Animal Genetic Diversity	206
11.9	Conserving Animal Genetic Diversity	207
11.10	Selectivity of Fishing Methods	211
11.11	Benefits and Use of Forests	213
11.12	World Forest Decline	215
11.13	Sustainable Development of Forests	217
12	BENEFITS AND COSTS IN BIODIVERSITY	219
12.1	Introduction	219
12.2	Biodiversity Use Values	219

12.3	Estimating the Benefits and Costs of Biodiversity	220
12.4	Non - market Valuation Methods	222
12.5	The Subtlety of Biodiversity Loss	223
12.6	Forest Biodiversity Benefit	225
12.7	Marine Biodiversity Benefit - Cost	226
12.8	Biodiversity and Human Health	228
13	ECONOMIC ANALYSIS OF BIODIVERSITY CONSERVATION	231
13.1	Introduction	231
13.2	Measures based on Relative Abundance	231
13.3	Use Value and Existence Values of Individual Species	234
13.4	Biological Prospecting	235
13.5	Biodiversity and Ecosystem Services	237
13.6	Strategies to Conserve Biodiversity	240
14	BIODIVERSITY CONSERVATION BEHAVIOUR	245
14.1	Introduction	245
14.2	Behaviors and Natural Resources	245
14.3	Social Assessment and Research	246
14.4	Values, Conservation, and Sustainability	249
14.5	A Synthetic Model of Biodiversity Conservation	251
14.6	Social and Ecological Conditions	252
14.7	Assessment and Research on Behaviors	253
14.8	Promoting Sustainable Behaviors	254
14.9	Identifying Critical Behaviors	254
14.10	Availability of Alternatives	257
14.11	Key Factors Influence Behaviors	259
14.12	World Bank Social Assessments	259
14.13	Multiple Factors	263
15	PRECAUTIONARY PRINCIPLE IN BIODIVERSITY CONSERVATION	264
15.1	Introduction	264
15.2	Cost - Effective Measures in Biodiversity Conservation	265
15.3	Precaution, Prevention, and Polluter - pays Principle in Biodiversity Conservation	265
15.4	Precautionary Principle in Biodiversity Conservation	266
15.5	Biodiversity and General Environmental Law and Policy	267
15.6	Regional Agreements in Biodiversity Conservation	269
15.7	Biodiversity Laws of Incorporation at the National Level	270
15.8	Multilateral Agreements and Policy Processes in Biodiversity Conservation	272
15.9	Biodiversity Laws Incorporation at National Level	274

15.10	International Trade Regulation Towards Biodiversity Conservation	275
15.11	Sectoral Features of Precaution in Biodiversity and Natural Resource Management	276
16	BIODIVERSITY CONVENTION AND CONSERVATION	278
16.1	Introduction	278
16.2	Biodiversity Convention Meaning	278
16.3	The Six Biodiversity - related Conventions	280
16.4	Biodiversity Conservation Programmes	283
16.5	Enrichment of Biodiversity	286
16.6	Copyrights in Biodiversity Conservation Literature	287
16.7	The Indian Biodiversity Act	288
17	BIODIVERSITY SURVEY TECHNIQUES	293
17.1	Biodiversity Survey Introduction	293
17.2	Need for Biodiversity Survey	293
17.3	The Best Use of Survey Results	293
17.4	Sampling Effort in Biodiversity Survey	295
17.5	Strategies for Locating Sites in Biodiversity Survey	295
17.6	Plants Survey Method	297
17.7	Birds Survey Method	297
17.8	Mammals Survey Method	298
17.9	Reptiles and Frogs Survey Method	298
17.10	Mammal Voucher Specimens	301
17.11	Anabat Detection in Biodiversity Survey	302
17.12	Cage Traps in Biodiversity Survey	304
17.13	Nocturnal Call Playback in Biodiversity Survey	306
17.14	Elliott Traps in Biodiversity Survey	307
17.15	Opportunistic Mammal Sightings	308
17.16	Spotlighting in Biodiversity Survey	310
17.17	Scat Collection in Biodiversity Survey	313
17.18	Point Count Method in Biodiversity Survey	315
17.19	Bird Survey	317
17.20	Plants Survey Method	319
17.21	Preservation of Plants	320
17.22	Field Data Sheet in Biodiversity Survey	323
17.23	Invertebrate Survey	327
17.24	Aerial and Sweep Nets in Biodiversity Survey	333
17.25	Malaise Traps	335
17.26	Opportunistic Invertebrates Sightings	338
17.27	Frogs and Reptile Survey	339

18 BIODIVERSITY ASSESSMENT TECHNIQUES	346
18.1 Introduction	346
18.2 Biodiversity in Protection against Pathogens	346
18.3 Scientific Biodiversity Assessment Tools	347
18.4 Man and the Biosphere Program	348
18.5 Bioquality: Star System and Genetic Heat Index	349
18.6 GIS and Gap Analysis	350
18.7 Ethnobotany in Biodiversity Assessment	352
18.8 Ecological Anthropology in Biodiversity Assessment	353
18.9 Participatory Rural Appraisal in Biodiversity Assessment	353
18.10 Multidisciplinary Landscape Assessments in Biodiversity Assessment	354
18.11 Local - level Biodiversity Assessment	354
18.12 A Critical Evaluation of Biodiversity Assessment	357
18.13 Revealed Preferences Techniques in Biodiversity Assessment	357
18.14 Stated Preferences Techniques in Biodiversity Assessment	358
18.15 Application of the Valuation Techniques to Biodiversity	358
18.16 Meta - analytical Methods for Comparative Biodiversity Valuation	361
18.17 Statistical Techniques in Biodiversity Assessment	362
18.18 Market and Non-market Approaches in Biodiversity Assessment	364
18.19 Concepts of Economic Value of Biodiversity	364
18.20 Biodiversity vs. Biological Resources	365
18.21 Review of Studies that Value the Biological Resource	366
18.22 Benefits Transfer and Biodiversity	370
19 BIODIVERSITY MEASUREMENT	372
19.1 Components of Biodiversity	372
19.2 Measurement of Biodiversity	374
19.3 Factors Affecting Species Richness	375
19.4 Relationship between Endemism and Species Richness	377
19.5 Issues on Measuring Biodiversity	378
19.6 Best Estimates of Biodiversity Value	379
19.7 Phylogenetic and Taxonomic Measures	381
19.8 Measure of Gene Character Richness	381
19.9 Diversity Measurement based on Three Assumptions	383
19.10 Non-parametric Indices in Biodiversity Measurement	384
19.11 Taxonomic Indices in Biodiversity Measurement	385
19.12 The Niche Preemption Model in Biodiversity Measurement	387
19.13 Economic Measures of Biodiversity	389
19.14 Measurement of Alpha Diversity	390
19.15 Measurement of Beta Diversity	393

19.16	Indicators of Biodiversity	395
20	BIODIVERSITY MONITORING	397
20.1	Introduction	397
20.2	Monitoring Biodiversity Related Changes	397
20.3	Baseline Data Collection for Biodiversity Related Parameters	398
20.4	Indicators of Biodiversity	401
20.5	Methods of Sampling Applied for Studying Biodiversity	402
20.6	Odonate Predators and Coleoptera and Hymenoptera	406
20.7	Rainfall Intensity and Infiltration in Biodiversity Monitoring	407
20.8	Indicators of Water Related Changes and Associated Methods	411
20.9	Impact Study and Preparation in Biodiversity Monitoring	413
20.10	Decision-making in Biodiversity Monitoring	414
20.11	Ecosystem Approach in Biodiversity Monitoring	415
21	CLIMATE CHANGE AND BIODIVERSITY	417
21.1	Introduction	417
21.2	Effects of Climate on Biodiversity	417
21.3	The Links between Climate Change and Biodiversity	418
21.4	Responses to Climate Change Effects on Biodiversity	420
21.5	Climate Change Challenge to Biodiversity	427
21.6	Biodiversity Conservation Issues	428
21.7	Climate Change, Conservation and Development	430
21.8	Future Climate Change Impact on Biodiversity	431
21.9	Measures to Reduce Climate Change Impact on Biodiversity	431
21.10	Contribution to Climate Change	433
21.11	Research Priorities in Biodiversity Climate Change Impact	434
22	INDIGENOUS KNOWLEDGE AND BIODIVERSITY	437
22.1	Introduction	437
22.2	Indigenous Knowledge Projects	437
22.3	Local Vegetation Management in Biodiversity Conservation	440
22.4	Biodiversity in Sacred Cliffs	441
22.5	Farm Biodiversity Conservation	442
22.6	Cultivation of Medicinal Plants	443
22.7	Traditional Ethos in Biodiversity Conservation	443
22.8	Traditional Knowledge on Water and Biodiversity	445
22.9	Conservation Principles in Ancient Texts	446
22.10	Biodiversity Conservation Issues in Traditional Knowledge	448
22.11	Water Harvesting and Biodiversity Conservation	449
22.12	Incorporating Traditional Knowledge in Practice	450

22.13	Indigenous Peoples and Biodiversity	451
22.14	Biological Diversity and Diversity of Cultures	452
22.15	Biodiversity and Biomass Appropriation	454
22.16	Biodiversity and Indigenous People's Lands and Waters	455
22.17	Biodiversity and Ethnoecology	456
22.18	Conserving Biodiversity by Empowering Indigenous Peoples	459
23	GENDER AND BIODIVERSITY	461
23.1	Gender Concept in Biodiversity	461
23.2	The Gender Perspective in Biodiversity Conservation	463
23.3	Gender Dimensions of Biodiversity Management	465
23.4	FAO, Gender and Biodiversity	466
23.5	Different Perspectives of Women and Biodiversity	467
23.6	Different Priorities in Gender Dimension of Biodiversity Conservation	467
23.7	Biodiversity from Gender Perspective	470
23.8	Ecofeminism and Biodiversity	472
23.9	Design of Conservation Activities	474
23.10	Suggested Themes for a Gender - sensitive Assessment	475
23.11	Innovative Approaches and Future Direction in Gender Dimension of Biodiversity	479
23.12	Global Action for Women Role in Biodiversity Conservation	482
23.13	International and Regional Cooperation and Coordination	486
23.14	Health and Sustainable Development	488
23.15	Means of Implementation of Biodiversity Issues	490
23.16	Gender Mainstreaming in the United Nations	490
24	PEOPLE'S BIODIVERSITY REGISTER	492
24.1	Introduction	492
24.2	Basic Behavioral Issues in People's Biodiversity Register	492
24.3	Economics and Biodiversity Conservation	494
24.4	Revealed Preference and Biodiversity Conservation	494
24.5	People's Biodiversity Register	495
24.6	Biodiversity Registers	497
24.7	Socio-Economic Profile	497
24.8	Invertebrate Animals	502
24.9	General Characteristics of Insects	503
24.10	Vertebrate Animals	506
24.11	Horticultural Plants	509
25	BIODIVERSITY RESEARCH ISSUES	510
25.1	Introduction	510

25.2	Biodiversity Policy Issues	510
25.3	Research Issues on Biodiversity Maintenance	511
25.4	Research Issues on Ecosystem Functions	511
25.5	Research Issues on Biodiversity Resilience	512
25.6	Research Issues on Sustainable Use of Biodiversity	513
25.7	Research Issues on Biodiversity markets	513
25.8	Literature Review in Social Science Research on Biodiversity	514
25.9	Direct Behavioral Observation in Social Science Research	514
25.10	Maps and Transects in Social Science Research	516
25.11	Rapid Rural Appraisal	518
26	BIODIVERSITY EDUCATION	520
26.1	Biodiversity Education Methods	520
26.2	Outdoor Biodiversity Education	521
26.3	Biotic Richness	523
26.4	Biodiversity Meaning Conceptualization	525
26.5	Lesson Experiencing the Outdoor Site	527
26.6	Activity Creating a Map of the Outdoor Site	528
26.7	Prerequisites: Biodiversity Teaching	529
26.8	Background Information for the Teacher	531
26.9	Binomial Nomenclature	532
26.10	Teaching Identification	533
26.11	Measuring Environmental Factors	533
