

Contents

<i>Preface</i>	(v)
1. Introduction	1
The Plant Environment; The Mineral Nutrients; The Functions of the Mineral Nutrients; Toxic Effects of Mineral Elements; Knowledge of Phytogeography; Polyploidy and Plant Geography; Effects of Humidity on Plant Growth; Penman Equation; Stomates; Deficits In Vapor Pressure And Xylem Cavitation; Leaf Water Potential; Nutrient Deficiencies; Managing Water Loss; High Humidity And Leaf Wetness; The Future of Phytogeography	
2. Ecology	27
Historical Analogs; Historical Analogs and Landscapes; Historical Ecology; Climate, Ecology, and Human Health; Environmental Change and Opportunistic Species; Environmental Distress Syndrome: Monitoring Global Change; The Effects of Climate Variability on Epidemics; Marine Coastal Ecosystems; Discontinuities and Instability; The Costs of Climate Variability and Disease Outbreaks; The Ecological Effects of Roads; Direct Effects; Road Aversion and other Behavioural Modifications; Fragmentation and Isolation of Populations	
3. Plant Ecology	62
Plant Adaptations; Chemical Changes During Plant Growth; Systems of Soil Classification; Knowledge of Climatic Conditions; Management of Ecosystem; The Principles of Ecosystem Management; Water and Forested Ecosystems; Development of Community Wastelands and Denuded Forests; Effect of Orographic Factors in Modifying the Local Climate; Role of Vegetation in the Processes of Pedogenesis	
4. Plant Phytogeography and Geography	100
Plant Phylogeny; Major Taxonomic Groups of Plants; Moss Life Cycle; Plant Stress Symptomatology; Temperature And Fertilization Influence On Sorghum Bicolor Response To Benlate Df And Wp; Influence Of Adsorptive Surface On The Response Of Sorghum To Benlate Df And Benlate Wp; Reversal By Magnesium Of Supposed Benlate Df-Induced	

Growth Responses; Influence Of Methyl-benzimidazol-carbamate (Mbc), Benomyl, And Benlate Df Formulate On Plant Growth; Influence Of Benomyl, Benlate Df, And Benlate Wp On The Calcium (45 Ca^{2+}) Uptake By Roots Of Sorghum And Maize Seedlings

5. Ecological Processes in Forest	133
Ecology and the Politics of Knowledge; Forests and Climate Change; Climate Change Impacts on Forest Health; Urban Forests and Trees; Forests and Community Development; Ecosystem of Tropical Rainforest	
6. Plant Adaptations to Variation in the Environment	170
Response to Ultraviolet Radiation; Periodicity and Plant Processes; Mineral and Environmental Stresses; Environmental Features of Coastal Zone; The Emerging Science of Environmental Applications	
7. Ecological Geography and Conservation	188
Importance in Ecology; Scientific Methods in Ecology	
8. Forest Ecology	198
Ecology Movements and Conflicts Over Forest Natural Resources; Forest Hydrology and Management; Invertebrate Species in Forest Ecosystems	
Bibliography	213
Index	215
