

Contents

Preface	ix
Contributors	xi
PART A—General Aspects	
A1. Biosynthesis of Membrane Glycoproteins <i>André Verbert</i>	1 3
A2. Structure and Analysis of Glycoprotein-Associated Oligosaccharides <i>Jean-Claude Michalski</i>	17
A3. General Overview of the Structure, Synthesis and Degradation of Glycosaminoglycans and Glycolipids <i>Jean-Pierre Zanetta</i>	37
A4. Basement Membrane and Extracellular Matrix Organization <i>Monique Aumailley</i>	47
A5. Membrane Lectins as Adhesion Receptors <i>Michèle Aubery</i>	61
PART B—Relevance to Pathology and Therapeutic Aspects	71
B1. The Involvement of Bisecting N-Acetylglucosamine in Cancer <i>Naoyuki Taniguchi, Cong-Xiao Gao, Yoshita Ihara, Eiji Miyoshi, Marafumi Yoshimura, Yin Sheng, Ahmed S. Sultan and Yoshitaka Ikeda</i>	73
B2. β 1,6 N-Acetylglucosaminyltransferase V is a Determinant of Cancer Growth and Metastasis <i>James W. Dennis and Maria Granovsky</i>	89
B3. β (1-6)-N-Acetylglucosamine-Branched N-Glycans in Normal and Pathological Lymphocyte Behaviour <i>Christian Derappe</i>	105
B4. Roles of Glycans in Bacterial Infections: Interaction Host-Mycobacteria <i>Martine Gilleron, Michel Rivière and Germain Puzo</i>	113
B5. Neuropathologies Involving Endogenous Lectins and their Ligands <i>Jean-Pierre Zanetta and Jean-Claude Michalski</i>	141
B6. Low-Tech Mannose Therapy for Protein Glycosylation Deficiencies <i>Hudson H. Freeze, Hinrich K. Harms and Thorsten Marquardt</i>	169
B7. Glycoconjugates as Vectors for Gene and Oligonucleotide Delivery <i>Michel Monsigny, Christophe Quétard, Eric Duverger, Chantal Pichon, Valérie Altemayer, Sylvain Bourgerie, Violaine Carriere, Patrick Midoux, Roger Mayer and Annie-Claude Roche</i>	193
Index	217
