

Table of Contents

Preface	i
Acknowledgements	iii
Table of Contents	v
1 Introduction	1
1.1 Biophysical vegetation processes	2
1.1.1 Biophysical process modelling	2
1.2 Vegetation radiative transfer	4
1.2.1 Radiative transfer models	6
1.3 Research Objective	8
1.4 Structure of this thesis	8
2 Experimental Setup	11
2.1 Introduction	12
2.2 Original Goniometric Setup	13
2.2.1 Improvements	14
2.2.2 Automated Control	15
2.2.3 Viewing Angles	15
2.2.4 Operational calibration	15
2.2.5 Sensors	16
2.3 Contact measurements	17
2.4 Field sites	18
2.4.1 SEN2FLEX	19
2.4.2 EAGLE	21
2.4.3 AGRISAR	22
2.5 Results and Discussion	24
2.5.1 Reflectance variation in different grass canopies	24
2.5.2 Reflectance variation in different maize canopies	25
2.5.3 Directional variation in different crop types	26
2.6 Conclusions and outlook	28
3 Identification of Land surface components	29
3.1 Introduction	30
3.2 Methodology	31
3.2.1 Directional radiative signatures	32
3.2.2 Land surface components identification	33
3.2.3 Component brightness temperature extraction	34
3.3 Results	35
3.3.1 Directional radiative signatures	35
3.3.2 Land surface component skin temperatures	36
3.3.3 Extraction of component temperatures	38
3.4 Discussion	40
3.5 Conclusion	41
4 The SCOPE model	43
4.1 Introduction	44
4.2 Model description	45

4.2.1	Atmospheric optical inputs	47
4.2.2	Direct and diffuse radiation fluxes	47
4.2.3	Internally generated thermal radiation	49
4.2.4	Net radiation	51
4.2.5	The energy balance	51
4.2.6	Leaf biochemistry	52
4.2.7	Top of canopy radiance spectra	54
4.3	Output of SCOPE	55
4.3.1	Spectra	55
4.3.2	Directional radiance	57
4.3.3	Vertical profiles	58
4.4	Discussion and Conclusion	60
5	Validation of radiative transfer in SCOPE	63
5.1	Introduction	64
5.2	Methodology	66
5.2.1	Laser scanning	68
5.2.2	SAIL	69
5.2.3	DART	70
5.2.4	Simulation Parameters	70
5.3	Results	73
5.3.1	Structural parameter retrieval	73
5.3.2	SCOPE and SLC comparison	75
5.3.3	BRDFs of SCOPE, SLC and DART	76
5.3.4	DART scenarios, a comparison	78
5.3.5	DART and SCOPE, a comparison	82
5.3.6	DART and SLC, a comparison	85
5.4	Conclusion	88
6	Retrieval of skin temperatures from directional observations	91
6.1	Introduction	92
6.2	Methodology	93
6.2.1	Traditional retrieval algorithms	94
6.2.2	Sensitivity analysis	97
6.2.3	Field measurements	102
6.3	Results	102
6.3.1	Sensitivity study	102
6.3.2	Inversion of goniometric measurements	105
6.4	Conclusion	108
7	Applying SCOPE for SEBS evaluation	111
7.1	Introduction	112
7.1.1	Methodology	114
7.1.2	Surface Energy Balance	115
7.1.3	Evaporative Fraction	117
7.2	Experimental Setup	117
7.3	Results	118
7.3.1	Roughness heights	118

7.3.2	Instantaneous heat fluxes	120
7.3.3	Evaporative fraction	123
7.4	Conclusions	125
8	Concluding Remarks	127
8.1	Synthesis	127
8.2	Field measurements	128
8.3	Modelling	129
8.4	Validation	129
8.5	Applications	130
8.6	Limitations	132
8.7	Related to the Objectives	132
8.8	Outlook	133
9	Bibliography	135
10	Summary	151
11	Samenvatting	155
12	ITC Dissertation List	158
