

Contents

Preface	v
1. Nature, Values and Distribution of Biodiversity	1
1. Nature of Biodiversity	1
2. Value of Biodiversity	3
3. Magnitude and Distribution of Biodiversity	21
4. India: A Mega Diversity Center – Floristic Richness and Centers of Plant Diversity of India	27
5. Agro Diversity – Vavilov Centers of Crop Plants	33
6. Exotics and Invasives	46
2. Conservation of Biodiversity	49
1. Conservation Principles	49
2. Process of Extinction	51
3. Threats to Biodiversity	52
4. Conservation of Biodiversity	57
3. Global and National Biodiversity Conservation Initiatives	67
1. Brief Account on National and International Conservation Organizations	67
2. Important Conventions and Agreements on Biodiversity Conservation	75
3. Intellectual Property Rights and Patents (IPRP)	79
4. National Biodiversity Bill of India	81

5. Joint Forest Management (JFM)	82
6. People's Biodiversity Registers (PBR)	83
7. Environmental Impact Assessment (EIA)	84
8. Bio-security in India	86
9. Concept of Sustainable Development	89
4. Remote Sensing and Plant Resources Management	91
1. Principles of Remote Sensing	91
2. A Brief Account on Aerial Photography and Types of Photographs	94
3. Satellite Remote Sensing – Types of Satellites and Sensors	99
4. Applications of Remote Sensing Technology	106
5. Applications of Remote Sensing in Global Climate Studies	110
6. Applications of Remote Sensing in Biodiversity Studies	113
7. Principles and Applications of GIS System	115
8. Principles and Applications of Global Positioning System	121
