

Contents

Preface	v
1. Water Metabolism	1
1.1. <i>The Structure and Properties of Water</i>	
1.2. <i>Imbibition</i>	
1.3. <i>Diffusion</i>	
1.4. <i>Permeability</i>	
1.5. <i>Osmosis</i>	
1.6. <i>Osmotic Pressure (OP)</i>	
1.7. <i>Turgor Pressure (TP)</i>	
1.8. <i>Diffusion Pressure Deficit (DPD) or Suction Pressure</i>	
1.9. <i>Concept of Water Potential</i>	
1.10. <i>The Component of Water Potential</i>	
1.11. <i>Water in the Soil</i>	
1.12. <i>Water Absorption</i>	
1.12.1. <i>Mechanism of Water Absorption</i>	
1.13. <i>Water Movement in Root</i>	
1.14. <i>Ascent of Water (or Translocation)</i>	
1.15. <i>Root Pressure Theory</i>	
1.16. <i>Vital Theory</i>	
1.17. <i>The Cohesion-Tension Theory</i>	
1.18. <i>Transpiration</i>	
1.18.1. <i>Stomatal Transpiration</i>	

2. Mineral Nutrition**23**

- 2.1. *Nutrient Deficiency Symptoms and Specific Function of Macro and Micronutrients*
- 2.2. *Absorption and Transport of Mineral Salts (or solute)*
- 2.3. *Mechanism of Mineral Absorption*
 - 2.3.1. *Passive Absorption (or Transport)*
 - 2.3.2. *Diffusion*
 - 2.3.3. *Facilitated Diffusion*
 - 2.3.4. *Ion Exchange*
 - 2.3.5. *Donnan Equilibrium*
 - 2.3.6. *Active Absorption*
- 2.4. *Mechanism of Active Absorption or Transport*
 - 2.4.1. *Carrier Concept*
 - 2.4.2. *Primary Active Transport*
 - 2.4.3. *Secondary Active Transport*
- 2.5. *Translocation of Mineral Salts*
 - 2.5.1. *Mechanism of Translocation*

3. Nitrogen Metabolism**41**

- 3.1. *Nitrogen Passes through Several Forms in a Biogeochemical Cycle*
- 3.2. *Biological Nitrogen Fixation*
- 3.3. *Free-Living and Symbiotic Bacteria Fix Nitrogen*
- 3.4. *Nitrogen Fixation Requires Anaerobic Conditions*
- 3.5. *Nodulation and Nod Factors*
 - 3.5.1. *Nodule Formation*
 - 3.5.2. *The Nitrogenase Enzyme Complex Fixes N_2*
- 3.6. *Nitrate Assimilation*
- 3.7. *Nitrite Reductase Converts Nitrite to Ammonium*
- 3.8. *Ammonium Assimilation*
- 3.9. *Transamination Reactions Transfer Nitrogen*

4. Photosynthesis**55**

- 4.1. *Photosynthetic Apparatus*
- 4.2. *Photosynthetic Pigments*
- 4.3. *Light*
- 4.4. *Action Spectra Relate Light Absorption to Photosynthetic Activity*
- 4.5. *Photosystems Complex*
- 4.6. *Mechanism of Light Reaction (or Energy transducer or Hill reaction or Photophosphorylation)*

- 4.7. *Photolysis of Water*
- 4.8. *Electron Flow through the Cytochrome b₆f Complex also Transports Protons*
- 4.9. *Plastoquinone and Plastocyanin Carry Electrons between Photosystem I and II*
- 4.10. *The Photosystem I Reaction Center Reduces NADP⁺*
- 4.11. *Cyclic Photophosphorylation or Cyclic Electron Transport*
- 4.12. *Proton Transport and ATP Synthesis in the Chloroplast*
- 4.13. *Some Herbicides Block Electron Flow*
- 4.14. *Repair and Regulation of the Photosynthetic Machinery*
- 4.15. *Carotenoids Serve as Photoprotective Agents*
- 4.16. *Some Xanthophylls also Participate in Energy Dissipation*
- 4.17. *Carbon Assimilation (Dark Reaction)*
- 4.18. *Calvin Cycle, or Reductive Pentose Phosphate [RPP] Cycle (C₃ Cycle)*
 - 4.18.1. *Regulation of the Calvin Cycle*
 - 4.18.2. *Regulation of Rubisco Activity*
- 4.19. *The C₂ or Oxidative Photosynthetic Carbon Cycle (Photorespiration)*
- 4.20. *Competition between Carboxylation and Oxygenation Decreases the Efficiency of Photosynthesis*
- 4.21. *CO₂-Concentration Mechanisms*
 - 4.21.1. *The C₄ Carbon Cycle (Hatch and Slack Cycle)*
 - 4.21.2. *Malate and Aspartate are Carboxylation Products of the C₄ Cycle*
- 4.22. *Crassulacean Acid Metabolism (CAM)*
- 4.23. *Algal and Cynobacterial CO₂ Pumps*
- 4.24. *Chloroplast Movement and Leaf Movement can control Light Absorption*
- 4.25. *Photosynthetic Responses to Light*
- 4.26. *Photosynthetic Responses to Carbon Dioxide*
- 4.27. *Discrimination of Carbon Isotopes Reveals Different Photosynthetic Pathways*
- 4.28. *Photosynthetic Responses to Temperature*

5. **Respiration**

109

- 5.1. *Glycolysis*
- 5.2. *Fermentation*
- 5.3. *Pentose Phosphate Pathway (or oxidative pentose phosphate pathway or Hexose mono phosphate shunt)*
- 5.4. *The Citric Acid Cycle*
- 5.5. *Electron Transport and ATP Synthesis at the Inner Mitochondrial Membrane*
- 5.6. *Balance Sheet of ATP*
- 5.7. *The Uncoupling Protein*
- 5.8. *Storage Lipids are Converted into Carbohydrates in Germinating Seeds (Glyoxylate Cycle)*

6. Plant Hormone**129**

- 6.1. *Auxin*
 - 6.1.1. *Biosynthesis*
 - 6.1.2. *Auxin Transport*
 - 6.1.3. *Physiological Effects of Auxin*
 - 6.1.4. *Apical Dominance*
- 6.2. *Gibberellins*
 - 6.2.1. *Biosynthesis and Metabolism*
 - 6.2.3. *Effects of Gibberellin*
 - 6.2.4. *Gibberellin Signal Transduction*
- 6.3. *Cytokinins*
 - 6.3.1. *Biosynthesis*
 - 6.3.2. *Physiological Effects of Cytokinins*
- 6.4. *Ethylene*
 - 6.4.1. *Structure and Biosynthesis of Ethylene*
 - 6.4.2. *Physiological Effects of Ethylene*
 - 6.4.3. *Ethylene Biosynthesis in the Abscission Zone is Regulated by Auxin*
 - 6.4.4. *Ethylene has Important Commercial Uses*
- 6.5. *Abscisic Acid (ABA)*
 - 6.5.1. *Biosynthesis and Metabolism*
 - 6.5.2. *Physiological Effects of ABA*

7. Secondary Metabolites**151**

- 7.1. *Terpenes*
- 7.2. *Phenolic Compounds*
- 7.3. *Lignin*
- 7.4. *Flavonoids*
- 7.5. *Tannins*
- 7.6. *Nitrogen-Containing Compounds*
 - 7.6.1. *Alkaloids*
 - 7.6.2. *Cyanogenic Glycosides*
 - 7.6.3. *Glucosinolates*
 - 7.6.4. *Jasmonic Acid*
 - 7.6.5. *Nonprotein Amino Acids*

8. Sensory Photobiology**165**

- 8.1. *Control of Flowering*
- 8.2. *Floral Meristems and Floral Organ Development*

8.3. <i>The ABC Model Explains the Determination of Floral Organ Identity</i>	
8.4. <i>Flora Evocation</i>	
8.5. <i>Circadian Rhythms: The Clock Within</i>	
8.6. <i>Characteristic Features of Circadian Rhythms</i>	
8.7. <i>Photoperiodism</i>	
8.8. <i>The Flowering Stimulus: Florigen Concept</i>	
8.9. <i>Vernalization</i>	
8.10. <i>Phytochrome</i>	
8.11. <i>Dormancy of Seeds</i>	
8.12. <i>Bud Dormancy</i>	
8.13. <i>Seed Germination</i>	
8.14. <i>Senescence and Programmed Cell Death</i>	
8.15. <i>Plant Movements</i>	
9. Stress Physiology	203
9.1. <i>Water Deficity and Drought Resistance</i>	
9.2. <i>Heat Stress and Heat Shock</i>	
9.3. <i>Chilling and Freezing</i>	
9.4. <i>Salinity Stress</i>	
9.5. <i>Oxygen Deficiency</i>	
Glossary	219
Index	235
