

Contents

Preface	(v)
1. Diversity of Vertebrates	1
The Vertebrates; Development of Vertebrates ; Origin of the Vertebrates	
2. Classes of Vertebrates	27
Major Classes of Vertebrates; Classification of Vertebrates; Glands and scales of Vertebrates ; Horns and claws of Vertebrates ; Respiration in Terrestrial Vertebrates; Circulatory System; Respiratory System; Comparative Anatomy and Physiology	
3. Class Aves	51
Characteristics of Class Aves; Evolution and Classification; Early Evolution of Birds; What is Vertebrate Respiratory System; Anatomy in invertebrates; Humans and Mammals; Adaptations for External Respiration	
4. The Basics of Vertebrate Evolution	68
Feathers and hairs of Vertebrates ; Processes of Evolution; Evolution of heart in Vertebrates ; Evolution of aortic arches and portal systems in Vertebrates	
5. Vertebrate Circulatory System	103
Chambers of the Heart; Human Circulation; Blood Circulation in Vertebrates ; Circulatory System; Respiratory system in Vertebrates; Characters of Respiratory tissue in Vertebrates ; Trends in organ systems- Vertebrate circulatory systems; Types of Circulatory Systems; Vertebrate Vascular Systems ; Diseases of the Heart and Cardiovascular System; The Vascular System	
6. Mammal Vertebrate	135
Mammalian Characteristics; Class of vertebrate Mammals; Mammaliaformes; adaptations of Mammal Characteristics; Diversity of Land Mammals; Protochordates, Vertebrate Phylogeny And Molecular Classification of Placentals	

7. Development of Fishes	166
Reproductive System ; Classification; Anatomy; Sensory and nervous system ; Immune System; Evolutionary Impact of Facultative Parthenogenesis	
8. Genetic Structure of Fish	186
Mitochondrial and chloroplast DNA; How can genetic variation be measured? ; Potential problems with allozymes and coding markers; Population structure in the flat oyster; DNA sequence variation; DNA fragment size variation; Protein variation; Levels of genetic differentiation in aquatic organisms; Mixed stock analysis (MSA); Genetics of small population size in the wild	
<i>Bibliography</i>	217
<i>Index</i>	219
