

Contents

Foreword	vii
Preface	xv
Acknowledgements	xvii
Contributors	xxi
1. Dissecting Oxygenic Photosynthesis: The Evolution of the "Z"-Scheme for Thylakoid Reactions	1
<i>Govindjee and Lars Olof Björn</i>	
2. Molecular Architecture of Photosynthetic Apparatus	28
<i>Jayashree K. Sainis, Rachna Agarwal and Michael Melzer</i>	
3. State Shifts in Photosynthetic Organisms: Tracking Traits and Techniques	38
<i>Prasanna Mohanty, Sreedhar Nellaepalli, Sujata Mishra and Rajagopal Subramanyam</i>	
4. Dissipation of Excess Absorbed Energy by the Photosynthetic Apparatus of Cyanobacteria	60
<i>Navasard V. Karapetyan, Vladimir V. Shubin, Irina V. Terekhova and Marina G. Rakhimberdieva</i>	
5. The Functional Sites of Electron Transfer Cofactors in Photosystem II Studied by Pulsed EPR	73
<i>Asako Kawamori and Hiroyuki Mino</i>	
6. Delayed Fluorescence of Chlorophyll <i>d</i> and Chlorophyll <i>a</i>; Emission/Excitation Spectra and Activation Energy in Photosystem II of <i>Acaryochloris marina</i> and <i>Synechocystis</i> sp. PCC 6803	86
<i>Yoshimasa Fukushima and Shigeru Itoh</i>	
7. Delayed Fluorescence in a Millisecond Range: A Probe for the Donor Side-induced Photoinhibition in Photosystem II	101
<i>Ralphreed A. Gasanov, Samira A. Aliyeva and Fikret Mamedov</i>	
8. Redox Control of Leaf Variegation and Chloroplast Biogenesis in <i>Arabidopsis thaliana</i>	108
<i>Dominic Rosso, Rainer Bode, Wenze Li, M. Krol, Steven R. Rodermel, Denis P. Maxwell, and Norman P.A. Hüner</i>	
9. Transcriptional Response to Low-O₂ Conditions in <i>Synechocystis</i> sp. Strain PCC 6803 Includes Induction of a Gene Cluster Containing <i>psbA1</i> and <i>petC2</i>	120
<i>Tina C. Summerfield, Jorg Toepel and Louis A. Sherman</i>	

10. Mutants of Chlorophyllide a Oxygenase	130
<i>Sujata R. Mishra, Young-Jae Eu, Krishna Nath, Altanzaya Tovu, Ismayil S. Zulfugarov, and Choon-Hwan Lee</i>	
11. A Comprehensive Study of the Effects of Nitrite Anion on Photosynthetic Electron Transport Chain	146
<i>Anjana Jajoo and Sudhakar Bharti</i>	
12. Mitochondrial Oxidative Metabolism Optimizes Photosynthetic Carbon Assimilation Through Redox and ROS Linked Metabolite Shuttles	158
<i>Kollipara Padmasree and Challabathula Dinakar</i>	
13. Leaf Senescence and Abiotic Stresses Share Chloroplast Degradation, Reactive Oxygen Species Involvement and Transcription Factors	167
<i>Renu Khanna-Chopra and Singh Srivalli</i>	
14. Inactivation and Repair of Photosynthetic Machinery under Heat Stress	189
<i>Suleyman I. Allakhverdiev, Vladimir D. Kreslavski, Irina R. Fomina, Dmitry A. Los, Vyacheslav V. Klimov, Mamoru Mimuro, Prasanna Mohanty and Robert Carpentier</i>	
15. Salinity Tolerance Strategies in Mangroves: Salt Shock Experiments for Assessing Stress-Triggered Effects During Salt Stress and Post-Stress Recovery in a True Mangrove, <i>Bruguiera gymnorrhiza</i>	217
<i>Bishnupriya Behera, Prasanna Mohanty and Anath Bandhu Das</i>	
16. Metal Toxicity and Photosynthesis	229
<i>Anjali Aggarwal, Iti Sharma, Bhumi Nath Tripathi, Ashok K. Munjal, Mamta Baunthiyal and Vinay Sharma</i>	
17. Effects of Heavy Metals on Photosynthetic Carbon Assimilation and Thermoluminescence in Unicellular Alga, <i>Chlorella pyrenoidosa</i>	237
<i>Gururaj Maralihalli and Jayashree K. Sainis</i>	
18. Photosynthetic Regulation of Senescence in Green Leaves: Involvement of Sugar Signaling	245
<i>Basanti Biswal, Pranab K. Mohapatra, Mukesh K. Raval and Udaya C. Biswal</i>	
19. UV Radiation and Photosynthesis	261
<i>K.N. Guruprasad and Priyanka Singh</i>	
Index	277
