

CONTENTS

Preface

1. Fishery

1.1 Inland Fisheries	v
1.2 Reservoir Fisheries	1
1.3 Estuarine Fisheries	4
1.4 Marine Fisheries	6
1.5 Characteristics of Undrainable and Drainable Ponds Suitable for Pisciculture	8
1.6 Physicochemical Features of Pond Suitable for Fish Culture	10
1.7 Types of Culturable Fishes	11
1.8 Culture of Carp Fishes in Ponds	13
1.9 Procurement of Seed	15
1.10 Induced Spawning by Hypophysation	18
1.11 Hatchery Systems	20
1.12 Pond Management	24
1.13 Composite Fish Culture	27
1.14 Steps of Carp Culture in Pond	33
1.15 Integrated Carp Farming	34
1.16 Sewage-fed Fish Culture	38
1.17 Fish Diseases	39
1.18 By-products of Fishing Industry	42
1.19 Jeol Fish Culture	46
1.20 Prawn Culture	49
1.21 Pearl Culture	52

2. Sericulture

2.1 Characteristic Features of Sericulture Industry	59
2.2 Role of Sericulture in the Upliftment of Rural Economy	72
2.3 Types of Silkmooths and Their Host Plants	73

2.4	Voltinism of <i>Bombyx</i>	74
2.5	Moltinism in <i>Bombyx</i>	75
2.6	Races of <i>Bombyx</i> on the Basis of Their Origin	75
2.7	Life Cycle of <i>Bombyx</i>	76
2.8	Structure of Silk Gland	79
2.9	Structure of Pupa	80
2.10	Mulberry Silkworm Rearing	80
2.11	Stiffling	90
2.12	Reeling	90
2.13	Physical Properties of Silk	93
2.14	Silkworm Diseases	95
2.15	Pest of <i>Bombyx</i>	99
2.16	Bottlenecks in the Expansion of Mulberry Sericulture in Drought-prone Laterite Belts	100
2.17	Research Potentialities to Improve Races and Varieties	102
3.	Lac Culture	109
3.1	Life Cycle of Lac Insect	110
3.2	Process of Lac Cultivation	112
3.3	Harvesting of Lac	115
3.4	Lac Processing	117
3.5	Composition of Lac	118
3.6	Lac Insect Enemies	118
3.7	Uses of Lac Products	118
3.8	Position of India in Lac Production	119
4.	Apiculture	122
4.1	Types of Honeybees	122
4.2	Different Castes of Honeybees	123
4.3	Structure of Beehive	124
4.4	Functions of Workers	124
4.5	Bee Dance	125
4.6	Mating	128
4.7	Life Cycle	128
4.8	Modern Artificial Hives (Langstroth Hive)	130
4.9	Bee Culture Equipment	133
4.10	Steps of Artificial Bee Culture	135
4.11	Honey	136
4.12	Chemical Composition of Honey	140
4.13	Medicinal Value of Honey	141

4.14 By-products of Apiculture	142
4.15 Enemies of Honeybees	144
4.16 Bacterial Diseases	147
4.17 Pesticide Losses	149
5. Poultry	154
5.1 Poultry Chickens	154
5.2 Duck Rearing	180
6. Cattles	197
6.1 Milch Breeds/Milk Breeds	197
6.2 Dual Purpose Breeds	197
6.3 Drought-Resistant Breeds	198
6.4 Exotic Cattle Breeds in India	202
6.5 Diseases of Cow	206
6.6 Cattle Breeding	209
6.7 Artificial Insemination	210
6.8 Systems of Breeding	212
6.9 Buffalo Farming	216
6.10 Goat Farming	228
7. Pests	240
7.1 Types of Pests	240
7.2 Paddy Pests	241
7.3 Jute Pests	247
7.4 Wheat Pest	251
7.5 Vegetable Pests	254
7.6 Pests of Mango	259
7.7 Pests of Sugarcane	267
7.8 Pests of Tea	271
7.9 Pests of Coccoanut	274
7.10 Stored Grain Pests	276
7.11 Eusociality in Termites	280
7.12 Rodent Pest (<i>Bandicoota bengalensis</i>)	284
7.13 Integrated Pest Management	287
7.14 Insecticides	290
7.15 Vermicomposting	293
8. Medical Zoology	302
8.1 Types of Parasitism	302
8.2 Types of Hosts	304

8.3 Inter-animal Associations	305
8.4 Some Diseases Caused by Protozoans and Helminthes	306
9. Arthropod Vector Biology	380
9.1 Mosquito	380
9.2 Sandfly - <i>Phlebotomus</i>	385
9.3 Flea (<i>Xenopsylla cheopis</i>)	387
9.4 Ticks	389
9.5 Louse	392
9.6 Bed Bugs	394
Bibliography	401
Index	407
