Preface	v
Acknowledgements	vii
1. General Laboratory Principles	1
1.1 Safety Rules.....	3
1.2 Cleaning Glassware and Plasticware.....	17
1.3 Basic Laboratory Techniques.....	20
<i>Review Questions</i>	29
2. Biochemistry	30
2.1 Determination of pK_a Value.....	30
2.2 Validation of Beer-Lambert Law.....	32
2.3 Determination of Absorption Maxima.....	35
2.4 Calibration Curve of Starch.....	36
2.5 Carbohydrates.....	39
2.6 Quantitative Analysis of Carbohydrates.....	46
2.7 Estimation of Proteins.....	59
2.8 Estimation of Amino Acids.....	67
2.9 Estimation of Lipid.....	69
2.10 Estimation of DNA.....	71
2.11 Estimation of RNA.....	73
2.12 Estimation of Ascorbic Acid in Plant Materials.....	76
2.13 Estimation of Thiamine.....	78
2.14 Quantitative Estimation of Phosphate Solubilisation in Culture Medium.....	79
<i>Review Questions</i>	80
3. Molecular Biology-I (Genomic Technology)	82
3.1 Isolation of Genomic DNA.....	82
3.2 Isolation of Plasmid DNA.....	99

3.3	Isolation of RNA	104
3.4	DNA Quantification and Quality Analysis	106
3.5	Agarose Gel Electrophoresis for DNA Quantification and Quality Analysis	108
3.6	Restriction Digestion	111
3.7	PCR Amplification	116
3.8	DNA Fingerprinting Technique	118
3.9	DNA Sequencing	133
3.10	Blotting Technique	137
3.11	Cloning	151
	<i>Review Questions</i>	154
4.	Molecular Biology-II (Proteomics Techniques).....	157
4.1	Protein Precipitation by Salting Out Method	157
4.2	Dialysis	160
4.3	Sodium Dodecyl Sulphate Polyacrylamide Gel Electrophoresis (SDS-PAGE) of Proteins	162
4.4	Native-PAGE	168
4.5	2-D Electrophoresis	173
	<i>Review Questions</i>	180
5.	Immunological Techniques.....	181
5.1	Immunodiffusion Techniques	181
5.2	Immuno-electrophoresis	186
5.3	Rocket Immuno-electrophoresis	188
5.4	Counter Current Immuno-electrophoresis	190
5.5	Enzyme-Linked Immunosorbent Assay (ELISA)	192
5.6	Antibody Production	203
5.7	Assay of Non-Specific Immune Parameters	208
	<i>Review Questions</i>	214
6.	Cytogenetics and Haematology.....	216
6.1	Study of Different Stages of Mitosis	216
6.2	Study of Different Stages of Meiosis	220
6.3	Karyotyping	222
6.4	Blood Grouping	226
6.5	Differential White Blood Cell Count (Differential Leukocyte Count)	229
6.6	Total Red Blood Cell Count	233
6.7	Estimation of Haemoglobin (Hb)	235
	<i>Review Questions</i>	239
7.	Microbial Techniques.....	241
7.1	Cleaning Glassware	241
7.2	Sterilization	242

7.3	Preparation of Culture Media	244
7.4	Techniques for Isolation of Pure Cultures	250
7.5	Gram Staining	255
7.6	Acid-Fast Staining	257
7.7	Fungal Staining	259
7.8	Mycorrhizal Staining	260
7.9	Isolation of Cyanobacteria	261
7.10	Isolation of Rhizobium	263
7.11	Microbial Growth Curve	265
7.12	Isolation of Bacteriophage	267
7.13	Isolation of Tobacco Mosaic Virus (TMV)	268
7.14	Antibiotic Assay	269
7.15	Bacterial Sensitivity	272
7.16	Paddy Straw Mushroom Cultivation	273
	<i>Review Questions</i>	279
8.	Fermentation and Enzyme Technology	280
8.1	Starter Culture Preparation for Bioethanol Production	280
8.2	Production of Ethanol	282
8.3	Ethanol Fermentation by Immobilization of Yeast	288
8.4	Estimation of Alcohol	290
8.5	Wine Production	291
8.6	Beer Production	294
8.7	Bioreactor Designing	296
8.8	Amylase Production	298
8.9	Enzymatic Assay	303
	<i>Review Questions</i>	313
9.	Plant Tissue Culture Techniques	315
9.1	Preparation of Culture Media	316
9.2	Callus Culture	320
9.3	Direct Organogenesis: Shoot Tip Culture	323
9.4	Embryo Culture	324
9.5	Cell Suspension Culture	325
9.6	Anther Culture	328
9.7	Induction of Hairy Roots using <i>Agrobacterium Rhizogenes</i>	329
9.8	<i>Agrobacterium</i> Mediated Biotransformation	331
9.9	Artificial Seeds/Synthetic Seeds	334
9.10	Protoplast Culture	336
9.11	Isolation of Protoplast by Mechanical Method	338
9.12	Isolation of Protoplast by Enzymatic Method	340
9.13	Gene Transfer by Particle Bombardment	342
9.14	Gene Transfer by Microinjection Technique	345

9.15	Gene Transfer by Electroporation Technique	346
9.16	PEG-Mediated Gene Transfer	348
	<i>Review Questions</i>	350
10.	Animal Cell Culture.....	352
10.1	Preparation of Media	352
10.2	Primary Cell Culture	357
10.3	Preparation of Established Cell Lines	359
10.4	Maintenance of Cell Lines	360
10.5	Preservation of Cell Lines	362
	<i>Review Questions</i>	364
11.	Pharmaceutical Bioprocessing Techniques.....	365
11.1	Extraction Techniques used for Isolating Phytochemicals from Medicinal Plants	365
11.2	Liquid-Liquid Extraction Technique	369
11.3	Chromatography	372
11.4	Qualitative Phytochemical Assay	395
11.5	Estimation of Total Flavonoid Content	396
11.6	Estimation of Total Tannin Content	397
11.7	Cytotoxicity Study (MTT Assay)	401
	<i>Review Questions</i>	402
12.	Analytical Procedures for Water Analysis.....	404
12.1	Dissolved Oxygen (DO)	404
12.2	Biochemical Oxygen Demand (BOD)	406
12.3	Chemical Oxygen Demand (COD)	408
12.4	Estimation of Phosphate (PO_4^{3-})	410
12.5	Estimation of Ammonia (NH_3)	412
12.6	Estimation of SO_4^{2-} (Sulphate)	414
12.7	Estimation of Nitrite	415
12.8	Estimation of Nitrate (NO_3^-)	416
12.9	Estimation of Chloride (Cl^-)	418
12.10	Estimation of Total Hardness	419
12.11	Determination of Total Alkalinity (Richards, 1954)	421
12.12	Estimation of Total Dissolved Solid	423
12.13	Estimation of Hexavalent Chromium	425
	<i>Review Questions</i>	426
13.	Biostatistics	427
13.1	Mean, Median, Mode, Standard Deviation	427
13.2	T-Test	432

13.3	Regression and Correlation	435
13.4	Analysis of Variance (ANOVA)	437
	<i>Review Questions</i>	442
14.	Bioinformatics Techniques	443
14.1	Database Search	443
14.2	BLAST (Basic Local Alignment Search Tool)	452
14.3	FASTA	457
14.4	Multiple Sequence Alignment	459
14.5	Study of Human Genome Data	463
14.6	Homology Modelling	471
	<i>Review Questions</i>	478
15.	Biophysical Techniques (Bioinstrumentation).....	480
15.1	Laminar Airflow	480
15.2	Centrifuge	482
15.3	Lyophilizer	484
15.4	Microscopy	485
15.5	UV-VIS Spectrophotometer	488
15.6	Electrophoresis	491
15.7	Gel Documentation System	493
15.8	UV-Transilluminators	494
15.9	High Performance Liquid Chromatography (HPLC)	495
15.10	Thermal Cycler	498
15.11	Microplate Reader	501
15.12	Infrared Spectroscopy	502
15.13	Nuclear Magnetic Resonance (NMR)	504
15.14	Mass Spectroscopy	506
15.15	X-Ray Diffraction	509
15.16	Microarray	511
	<i>Review Questions</i>	513
Index.....		515

Dr. Thatoi has published more than 150 research papers in national and international journals, book chapters and proceedings of seminars.

Dr. Supriya Dash, is a faculty in the Department of Biotechnology at College of Engineering and Technology, a constituent college of Biju Patnaik University of Technology, Rourkela, Odisha. She carried out her research work from Central Institute of Freshwater Aquaculture (CIFA), Bhubaneswar, a part-time faculty of ICAR as a research fellow. She obtained her PhD from Utkal University in the year 2008 on the topic 'Fish Immunology'. She teaches various subjects such as Immunology and Immunotechnology, Cell Biology and Genetics, Animal and Stem Cell Technology, Genomics and Proteomics etc. at B.Tech. and M.Tech. level. She has more than 7 years of teaching
