|-------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>1 The Analyses of Global Gene Expression and Transcription Factor Regulation . . . . .</b>                                 | <b>1</b>   |
| Raquel Cuevas Diaz Duran, Sudheer Menon and Jiaqian Wu                                                                        |            |
| <b>2 Global Approaches to Alternative Splicing and Its Regulation—Recent Advances and Open Questions . . . . .</b>            | <b>37</b>  |
| Yun-Hua Esther Hsiao, Ashley A. Cass, Jae Hoon Bahn, Xianzhi Lin and Xinshu Xiao                                              |            |
| <b>3 Long Noncoding RNAs: Critical Regulators for Cell Lineage Commitment in the Central Nervous System . . . . .</b>         | <b>73</b>  |
| Xiaomin Dong, Naveen Reddy Muppani and Jiaqian Wu                                                                             |            |
| <b>4 Gene Expression Models of Signaling Pathways . . . . .</b>                                                               | <b>99</b>  |
| Jeffrey T. Chang                                                                                                              |            |
| <b>5 From Gene Expression to Disease Phenotypes: Network-Based Approaches to Study Complex Human Diseases . . . . .</b>       | <b>115</b> |
| Quanwei Zhang, Wen Zhang, Rubén Nogales-Cadenas, Jhin-Rong Lin, Ying Cai and Zhengdong D. Zhang                               |            |
| <b>6 Introduction to Isoform Sequencing Using Pacific Biosciences Technology (Iso-Seq) . . . . .</b>                          | <b>141</b> |
| Manuel L. Gonzalez-Garay                                                                                                      |            |
| <b>7 Systematic and Integrative Analysis of Gene Expression to Identify Feature Genes Underlying Human Diseases . . . . .</b> | <b>161</b> |
| Zixing Wang, Wenlong Xu and Yin Liu                                                                                           |            |
