<i>Acknowledgements</i>		v
<i>About the Author</i>		vii
Chapter 1	Introduction	1
Chapter 2	The Early History of the DNA Repair Field	11
Chapter 3	The Composition and Structure of DNA	19
Chapter 4	The Era of Radiation Biology	25
Chapter 5	The Discovery of DNA Repair: Enzymatic Photoreactivation	29
Chapter 6	The Emergence of DNA Repair	59
Chapter 7	Excision Repair of DNA	63
	• Nucleotide Excision Repair (NER)	66
	• Transcription-Coupled Nucleotide Excision Repair (TCNER)	71
	• Base Excision Repair (BER)	75
Chapter 8	Recombinational DNA Repair	81
Chapter 9	Mismatch Repair	85
Chapter 10	The Adaptive and SOS Responses	89
	• The Adaptive Response to Alkylation Damage	89
	• The SOS Response to DNA Damage	92

Chapter 11	DNA Repair in the Context of Chromatin	95
Chapter 12	Hereditary Diseases Associated with Defective Responses to DNA Damage	99
	• Xeroderma Pigmentosum (XP)	99
	• Ataxia Telangiectasia (AT)	104
	• Hereditary Non-Polyposis Colon Cancer (HNPCC) also called Lynch Syndrome	107
	• Bloom's Syndrome	108
	• Fanconi Anemia	111
Chapter 13	Conclusion	115
	<i>Glossary</i>	117
	<i>Index</i>	139
