

Contents

<i>Introduction — In Search of Eternal Life</i>	vii
Chapter 1 Development of the Embryo	1
Chapter 2 A Brief Introduction to Growing Cells Outside the Body, or Cell Culture	7
Chapter 3 Regeneration and Stem Cells	11
Chapter 4 Adult Stem Cells	15
4.1 Bone Marrow	15
4.2 Self-Renewal	20
4.3 Clinical Trials with Adult Stem Cells	23
4.4 Other Sources of Adult Stem Cells	26
4.5 Cancer Stem Cells	35
4.6 Mechanisms of Action of Adult Stem Cells	36
4.7 Mesenchymal Stem Cells and Control of the Immune System	39
4.8 Adult Stem Cells: Conclusions	41
Chapter 5 Embryonic Stem Cells	43
5.1 The Embryonic Stem Cell Controversy	49
5.2 The Long Road to Human Embryonic Stem Cells in Brazil	54

5.3 Clinical Trials with Human Embryonic Stem Cells	58
5.4 Personalized Cell Therapy	61
5.5 Studying Human Biology with Pluripotent Stem Cells	69
5.6 Pluripotent Stem Cells for Drug Development	73
Chapter 6 Cell Therapy — Promise or Reality?	79
Chapter 7 Outlook	83
Final Note	85
References	91
