

Contents

<i>Preface</i>	v
----------------------	---

Chapter 1

Neurophysiology, a Discipline Developing Consciousness	1
A Scientist Who Loved Dogs	8
Aggressive Defense of a Doctrine	13
Reflecting on the Reflex and Synthesizing the Synapse	22
Inside Information on Nerve Electricity	30
Hans Berger, Discoverer of the Electroencephalogram	35
The Role of Chemical Messengers at Synapses	37
The Role of Critical Collaborators	44
Nerve Signals Travel at Different Velocities	47
A Controversial Nobel Prize	53
The Emerging Field of Neuropharmacology	57
Establishment of Neurophysiological Research at the Karolinska Institute	60

Chapter 2

Testing of Nobel Prize Patience and a Near Prize Recipient	69
Studies of the Interbrain and the Midbrain	70
Sleep and the Active Brain	77
Instruction or Selection	82
A Student Who Did Not Become a Neurophysiologist	86
The Nobel Committee Reviews Magoun's Work	88
Enter Eccles	91
A Frequently Nominated and Reviewed Candidate	95
Humoral or Electrical Transfer of Signals between Neurons	101

Eccles and a Scientific Approach to Dualism	102
Consciousness Revisited.....	106
It Is All a Matter of Dance of the Molecules	111
The Split Brain	115

Chapter 3

Two British Neurophysiologists and the Potential for Action.....	121
The Development of a Great Collaboration	122
The Discovery	129
The Nobel Committee Reviews Hodgkin-Huxley	131
Granit, the Prime Reviewer.....	133
A Second Insightful Reviewer.....	135
The Temperature Increases	137
A Year without Any Nomination and the Finish	141
The Nobel Festivities of 1963.....	143
Time for Nobel Lectures.....	147
A Second Important Discovery or Huxley Times Two.....	151
Genealogy and Polymaths.....	153
The Sodium Pump and Local Anesthetics — A Skou Interlude.....	156
Development of the Patch-Clamp Technique	160
The Deepening Insights into the Fine Structure of Membrane Channels	162
Visual Art and Sciences.....	167
Prizes in Neurophysiology after 1963	169
A Master Mentor	171
Still More Prizes in Neurobiology.....	174
And the Band Played On.....	177
The Continuous Expanding Developments of the Potentials of Brain Functions	181

Chapter 4

Advances in Organic Chemistry and Two 1955 Nobel Prizes	185
The Development of Chemistry at the Karolinska Institute	190
A Critical Leader and the Strong Advance of Organic Chemistry at the Institute	194
Blidö and the Snuffin	195
The Early Developments in Nucleic Acid Studies	198
The Development of an Obstinate and Strong-Willed Professor	200

Bringing Budding Biochemists to Flourish	202
The Nobel Prize Involvement.....	204
A Disappointed Prize Candidate Who Became Happy.....	205
The Life of a Committed Chemist	205
Important Contributions in Many Fields of Organic Chemistry.....	208
Oxytocin and Vasopressin.....	209
Nominations for a Prize in Physiology or Medicine and in Chemistry	212
Scientist and Musician.....	217
Early Life	217
Warburg and the World of Enzymes	220
Many Important Scientific Collaborations.....	224
Music and Arm Wrestling.....	225
Early Nomination for a Nobel Prize.....	231
Theorell's Own Involvement in the Nobel Prize Work.....	236
A New Wave of Nominations for a Prize.....	238
The Critical Year.....	240
David Keilin and the Possible Disadvantage of Competing with a Swedish Candidate	244
Two Chemists Sharing the Limelight.....	250
An Additional Note on Enzymes.....	252
A Nobel Jubilee and Theorell's Final Years	254
 <i>Chapter 5</i>	
A Tale of Two Gentle Scientists Who Changed the World	257
The Development of a Rich Life in Science.....	258
Towards a Nobel Prize in Chemistry	268
Prize Events in 1948.....	272
Gröder Ång and Notable Nobel Reviews	274
A Unique Biochemist, Who Received Two Nobel Prizes.....	276
A Quaker Mind and the Scientific Career	278
The Nobel Committee at the Karolinska Institute Examines Sanger's Insulin Studies.....	284
The Nobel Committee for Chemistry Reviews the Pioneering Protein Work.....	290
The First Visit to Stockholm.....	295
Developments after the First Nobel Prize — The RNA Years.....	299
The Second Nobel Prize	304
The Revolution of DNA Sequencing	307

The Evolution of Life	308
New Basis for Classification of Plants and Organisms	311
Human Genomics.....	312
To Write the Books of Life.....	316
The Importance of Hands-on Work in Science.....	317
Sanger and Students.....	319
The Halcyon Days.....	322

Chapter 6

1964 — An Important Year in the World and for Nobel Prizes	325
A Complex and Remarkable Mother Molecule	327
Steroids and the 1927 and 1928 Nobel Prizes in Chemistry.....	329
The Use of Radioactive Isotopes for Studies of Intermediary Metabolism.....	338
Another Swedish Star Chemist.....	341
Developments Towards the 1964 Nobel Prize in	
Physiology or Medicine	345
A Renaissance Scientist.....	345
The Value of a New Homeland	347
The Committee of Chemistry Examines Bloch and Lynen.....	349
A Highly Respected Chemist in the Pharmaceutical Industry.....	350
Reviews for a Prize to Bloch and Lynen at the Karolinska Institute.....	354
The Nobel Events in Stockholm in 1964.....	362
A Remarkable Duet of Clinician Scientists	368
A Receptor-Mediated Pathway for Cholesterol Homeostasis.....	371
Two Scientists Who Did Not Rest on Their Laurels	376
The Discovery of a "Penicillin" for Cholesterol.....	377
To the Benefit of Mankind.....	379

Chapter 7

Magnifiques, Nos 3 Nobel (Our Great 3 Nobels).....	381
A Unique French Institution	383
The Young Scientist.....	388
Lwoff and Lysogeny.....	393
Animal Viruses and the Evolution of a Statesman.....	399
A Rich Personality.....	402
The Reviews of Lwoff's Work by the Nobel Committee	405
A Culturally Enlightened Nobel Lecture.....	413

The Aftermath	415
Drivers of Evolution	417
From Traditional Genetics to the Central Dogma	418
Horizontal Gene Transfer and Recombinant DNA Technology	419
Stewards of Earth	421
Classification of Viruses and the Species Concept	423
Interaction between Biological Entities	426
A Virocentric View of Biology	429

Chapter 8

A Scientist of Many Talents	433
The Winding Road Towards Science	436
Unfair Omission of a Prize Candidate?	438
Music or Science?	439
The Two-Phase Growth Curve	441
The Dawn of Molecular Biology	444
Interlude 1—Lysenko and a Convenient Untruth	446
The Breaking of New Ground in Science	451
From Adaptation to Induction	452
Interlude 2—Leo Szilard, a Remarkable Physicist, Biologist and Peacemaker	454
The Unique Collaboration	458
Nominations and Evaluations of Monod for a Nobel Prize	
in Physiology or Medicine	462
Behavioural Sciences and Nobel Prizes in Physiology or Medicine	471
Chance and Necessity	474
The Phasing Out of an Intense Life Involving Science	477

Chapter 9

From Heroic War Efforts to Intellectual Battles	481
A Single Child Exposed to a Rich Environment	482
The Young Medic and the Gehenna of War	484
Back to the School Bench	486
What It Meant to Become a Scientist	488
The Serology of Bacteria	494
An Interrupted Movie Viewing	496
Good Friday 1960 and Messenger-RNA	500
Christmas Eve and a Remarkable Article	505

The Nobel Committee Reviews Jacob	507
Time for Nobel Festivities	512
A Life in Full	517
Exit Lwoff, Monod and Jacob. What Next?	520
Science and the Arts Revisited	524
Seeing the Invisible World and a Biased Proposal	525
Searching for Metaphors	526
Symbols and Esthetics	528
The Magic of Interplay of Numbers	531
The Act of Creation	533
<i>References</i>	537
<i>Index</i>	549
