

Contents

<i>Preface</i>	v
<i>Acknowledgment</i>	vii
<i>About the Authors</i>	ix
<i>List of Contributors</i>	xi
Chapter 1. Unsupervised clustering of time series gene expression data based on spectrum processing and autoregressive modeling	1
Chapter 2. Gene ontology-based analysis of time series gene expression data using support vector machines	22
Chapter 3. A comparative review of graph-based ensemble clustering as transformation methods for microarray data classification	53
Chapter 4. Semantic analytics of biomedical data	72
Chapter 5. Investigating interactions between proteins and nucleic acids by computational approaches	98

Chapter 6.	Bioinformatics analysis of microRNA and protein-protein interaction in plant host-pathogen interaction system	118
Chapter 7.	Computational modelling of the Alu-carrying RNA network in Th17-mediated autoimmune diseases	140
Chapter 8.	Principal component analysis based unsupervised feature extraction applied to bioinformatics analysis	153
Chapter 9.	Choquet integral algorithm for T-cell epitope prediction using support vector machine	183
Chapter 10.	Unsupervised clustering algorithms for flow/mass cytometry data	193
