

CONTENTS

Preface	v
Editorial Board of the BIOMAT Consortium	vii
Professor C.A. Floudas — In Memoriam	ix
Comprehensive Introduction to Agglomeration and Growth and Models <i>R. Kerner</i>	1
The Pattern Recognition of Probability Distributions of Amino Acids in Protein Families <i>R.P. Mondaini, S.C. de Albuquerque Neto</i>	29
Modelling the Electrical Activity of the Heart <i>R.A. Barrio, I. Dominguez-Roman, M.A. Quiroz-Juarez, O. Jimenez-Ramirez, R. Vazquez-Medina, J.L. Aragon</i>	51
How the Interval Between Primary and Booster Vaccination Affects Long-Term Disease Dynamics <i>A. Shoukat, A.L. Espindola, G. Röst, S.M. Moghadas</i>	60
Stability and Hopf Bifurcation in a Multi-delayed Eco-epidemiological Model <i>D. Adak, N. Bairagi</i>	72
Propagation of Extrinsic Perturbation in Multistep Biochemical Pathways <i>A.G. Nedungadi, S. Sinha</i>	97
Catastrophic Transitions in Coral Reef Biome under Invasion and Overfishing <i>S. Pal, J. Bhattachargya</i>	118
Dynamics of Hepatitis C Viral Load with Optimal Control Treatment Strategy <i>R. Keval, S. Banerjee</i>	141

Somitogenesis and Turing Pattern <i>A. Lemarchand, L. Signon, B. Nowakowski</i>	151
An Epidemiological Model of Viral Infections in a <i>Varroa</i> -infested Bee Colony: The Case of a Bee-dependent Mite Population Size <i>S. Bernardi, E. Venturino</i>	165
Does Sensitivity Analysis Validate Biological Relevance of Parameters in Model Development? Revisiting Two Basic Malaria Models <i>S. Mandal, S. Sinha</i>	187
Subcortical Homeostatic Circuitry Modulates Brain Waves and Behavioral Adaptation: Relevance for the Emerging Multidiscipline of Social Neuroscience <i>Limei Zhang de Barrio, V.S. Hernández, L.E. Eiden</i>	204
Protein Structure Estimation from Incomplete NMR Data <i>Z. Li, S. Lin, Y. Li, Q. Lei, Q. Zhao</i>	224
Decrypting How Proteins Move and Change their Shape <i>E. Laine</i>	239
Deterministic and Stochastic Model for HLTIV-I Infection of CD4 ⁺ T Cells <i>P.K. Srivastava</i>	253
Study of Global Stability and Optimal Treatment for An Infectious Disease Model <i>A. Kumar, P.K. Srivastava, A. Yadav</i>	269
Global Stability of a Modified HIV Infection Model with Saturation Incidence <i>J. Yang, Q. Zhang, L. Wang</i>	288
A Survey of Geometric Techniques for Pattern Recognition of Probability of Occurrence of Amino Acids in Protein Families <i>R.P. Mondaini</i>	304
Symmetry and Minimum Principle at the Basis of the Genetic Code <i>A. Sciarrino, P. Sorba</i>	327
Index	365
