LIST OF CONTRIBUTORS	v
--------------------------------	---

PREFACE	vii
-------------------	-----

1. Phytochemistry and Taxonomy

V. H. HEYWOOD

I. Introduction	1
II. Taxonomic Characters	3
III. Evolutionary Classification	12
IV. Systems of Classification of Angiosperms	15
V. Communication and Terminology	16
VI. Phytochemistry and Taxonomy: Today and Tomorrow	17
References	18

2. Biogenetic Classification of Plant Constituents

C. MENTZER

I. Introduction	21
II. Classification on the Basis of Chemical Structure	22
III. Biogenetic Classification	23
IV. Recent Examples of Biogenetic Classification	25
References	31

3. Chemotaxonomy or Biochemical Systematics?

R. E. ALSTON

I. Introduction	33
II. Comparative Biochemistry of Secondary Compounds	34
III. Distribution of Compounds Differing only in Substitution Pattern	40
IV. Distribution of Biosynthetically Related Compounds	45
V. Conclusions	53
References	55

4. The Distribution of Alkanes

A. G. DOUGLAS and G. EGLINTON

I. Introduction	57
II. The n-Alkanes	57
III. Cyclic and Branched Alkanes	66
IV. Isoprenoid Alkanes and Alkenes	68
V. Hydrocarbons as Biological Markers: An Approach to Organic Geochemistry	69
VI. Conclusion	74
References	74

5. The Biogenesis of Natural Acetylenes

J. D. BU'LOCK

I. Introduction	79
II. Precursors of Polyacetylenes	81
III. Formation of Acetylenes	83
IV. Chain Shortening	91
V. Conclusions	94
References	95

6. The Distribution of Terpenoids

G. WEISSMANN

I. Introduction	97
II. The Monoterpenes	100
III. The Sesquiterpenes	106
IV. The Diterpenes	113
References	118

7. The Carotenoids

T. W. GOODWIN

I. Distribution of Carotenoids in Photosynthetic Tissues	121
II. Distribution of Carotenoids in Non-Photosynthetic Tissue	126
III. Biochemical Aspects of the Distribution of Fruit Carotenoids	133
References	137

8. The Natural Distribution of Plant Polysaccharides

ELIZABETH PERCIVAL

I. Introduction	139
II. Cellulose	140
III. Hemicelluloses	140
IV. Pectic Acid and Gum Exudates	148
V. Uronic Acid-containing Polysaccharides of the Chlorophyceae	149
VI. Food Storage Polysaccharides	150
VII. Mannans, Galactomannans and Glucomannans	152
VIII. <i>Plantago</i> Mucilages	153
IX. Conclusions	154
References	155

9. The Asperulosides and The Aucubins

E. C. BATE-SMITH AND T. SWAIN

I. Introduction	159
II. The Chemistry of the Iridoids	162
III. Biosynthesis of the Iridoids	167
IV. Chemical Taxonomy of the Iridoids	168
References	172

10. The Distribution of Ranunculin and Cyanogenetic Compounds in the Ranunculaceae

H. W. L. RUIJGROK

I. Systematics of Ranunculaceae	175
II. Chemical Characters of Ranunculaceae	177
III. The Distribution of Ranunculin	178
IV. The Distribution of Cyanogenetic Compounds	184
V. Discussion	184
References	185

11. The Distribution of Sulphur Compounds

ANDERS KJÆR

I. Introduction	187
II. Various Important Groups of Sulphur-Containing Plant Constituents	187
III. Concluding Remarks	193
References	194

12. Amino Acids and Related Compounds

E. A. BELL

I. Introduction	195
II. Variation in Amino Acid Biosynthesis in the Papilionatae	198
III. Non-Protein Amino Acids in Other Genera	207
IV. Conclusions	208
Acknowledgements	208
References	209

13. Comparative Phytochemistry of Alkaloids

R. HEGNAUER

I. Definition and Classification	211
II. Distribution of Alkaloids in Cormophytes	212
III. Parallelism and Diversification	218
IV. Conclusions	230
References	230

14. The Betacyanins and Betaxanthins

TOM J. MABRY

I. Introduction	231
II. Structure of the Betacyanins	232
III. Structure of the Betaxanthins	235
IV. Biosynthesis of the Betacyanins and Betaxanthins	237
V. Taxonomic Significance of the Betacyanins and Betaxanthins	237
VI. Conclusions	241
Acknowledgements	243
References	244

15. Comparative Biochemistry of Hydroxyquinones

C. MATHIS

I. Introduction	245
II. Structure and Distribution of the Naturally Occurring Quinones	245
III. Biogenesis of Naturally Occurring Quinones	253
IV. Taxonomic Significance of Quinones in Higher Plants	261
V. Conclusions	269
References	269

16. The Evolution of Flavonoid Pigments in Plants

J. B. HARBORNE

I. Introduction	271
II. Flavonoids in Lower Plants	272
III. Flavonoids in Gymnosperms	274
IV. Flavonoids in Monocotyledons	276
V. Flavonoids of the Dicotyledons	277
VI. Evolution of Flavonoids	291
VII. Conclusion	293
References	294

17. Dihydrochalcones

A. H. WILLIAMS

I. Introduction	297
II. Dihydrochalcones in <i>Malus</i> Species	297
III. Dihydrochalcones in the Ericaceae	300
IV. Glycyphyllin in <i>Smilax</i> Species	301
V. Other Occurrences of Dihydrochalcones	303
VI. The Comparative Phytochemistry of Dihydrochalcones	303
References	306

18. Flavonoid C-Glycosides

H. WAGNER

I. Introduction	309
II. Types of Flavonoid C-Glycosides	311
III. Identification of C-Glycosides	313
References	318
