vii

1. Molecular Insights into Intracellular RNA Localization	1
Michael D. Blower	
1. Introduction	2
2. Extent and Locations of mRNA Localization	3
3. Mechanisms of mRNA Localization	14
4. Motor-Driven Directed Transport of Localization-Competent mRNPs	18
5. Formation and Structure of RNA Granules	23
6. Regulation and Roles of Localized mRNAs	27
7. Perspective	31
Acknowledgments	32
References	33
2. A Hypothesis on the Origin and Evolution of Tubulin	41
Richard F. Ludueña	
1. Introduction	44
2. Tubulin Isoforms	45
3. Evolution of the Tubulin/FtsZ Superfamily	80
4. The Origin of the C-Terminal Tail of Tubulin: Back Before the Beginning?	118
5. Experimental Tests of These Hypotheses	134
6. Concluding Remarks	138
Acknowledgments	140
References	140
3. Dynamin: Expanding Its Scope to the Cytoskeleton	187
Manisha Menon, Dorothy A. Schafer	
1. Introduction	188
2. Dynamin—A Membrane Remodeling GTPase	188
3. Actions of Dynamin and Actin Filaments during Endocytosis	194
4. Beyond Endocytosis: Dynamin as a Cytoskeletal Regulator	197
5. Dynamin Mutations, Cytoskeleton and Human Disease	209
6. Concluding Remarks	210
References	211

4. Beta-Barrel Scaffold of Fluorescent Proteins: Folding, Stability and Role in Chromophore Formation	221
Olesya V. Stepanenko, Olga V. Stepanenko, Irina M. Kuznetsova, Vladislav V. Verkhusha, Konstantin K. Turoverov	
1. Introduction	222
2. Chromophore Formation and Transformations in Fluorescent Proteins	224
3. Structure of Fluorescent Proteins and Their Unique Properties	236
4. Pioneering Studies of Fluorescent Protein Stability	243
5. Unfolding–Refolding of Fluorescent Proteins	250
6. Concluding Remarks	267
Acknowledgments	268
References	268
5. Cytoskeletal Proteins: Shaping Progression of Hepatitis C Virus-Induced Liver Disease	279
Sriparna Ghosh, Keith J. Kaplan, Laura W. Schrum, Herbert L. Bonkovsky	
1. Introduction	280
2. Overview of HCV	281
3. Pathology of Acute to CHC with Emphasis on CS Changes	285
4. Role in HCV Infection and Pathogenesis	288
5. Summary and Key Question for Future Research	307
References	310
6. Integrins and Small GTPases as Modulators of Phagocytosis	321
Samar Sayedyahosseini, Lina Dagnino	
1. Introduction	322
2. Integrins as Phagocytic Receptors	325
3. Biological Implications: Phagocytic Integrins and Apoptotic Cell Clearance	333
4. Integrin-Dependent Phagocytic Tissue Remodeling	335
5. Role of Phagocytosis in Tissue Maintenance and Homeostasis	336
6. Integrin-Dependent Phagocytosis and Pathogenesis	340
7. Conclusions and Perspectives	345
Acknowledgments	346
References	346
Index	355
