|---|-----|
| Preface.....  | v   |
| List of Contributors .....  | xi  |
| <b>Section A—General Features</b>   |     |
| 1 Chromosome Manipulations in Higher Plants—An Overview . . . . .<br><i>P. K. Gupta and T. Tsuchiya</i>   | 1   |
| 2 Terminology of Chromosome Numbers . . . . .<br><i>A. Levan and A. Müntzing</i>  | 15  |
| 3 Genetic Engineering in Crop Improvement . . . . .<br><i>W. Rohde, A. Marocco and F. Salamini</i>  | 27  |
| 4 Variation in Nuclear and Individual Chromosomal DNA Content<br>and its Role in Evolution of Plants . . . . .<br><i>Y. Furuta and K. Nishikawa</i> | 71  |
| 5 Cytogenetics of Chromosome Interchanges in Plants . . . . .<br><i>P. K. Gupta and S. N. Gupta</i>   | 87  |
| 6 Karyotype Reconstruction in Plants with Special Emphasis on<br><i>Vicia faba</i> L. . . . .<br><i>I. Schubert, R. Rieger and G. Künzle</i>        | 113 |
| 7 Cytogenetics of B-Chromosomes in Crops . . . . .<br><i>R. N. Jones</i>  | 141 |
| 8 Cytogenetics of Polyploids and Their Diploid Progenitors . . . . .<br><i>R. C. Jackson</i>  | 159 |

- 9 Monosomic Analysis in Maize and Other Diploid Crop Plants . . . 181  
*D. F. Weber*
- 10 Cytogenetic Changes During Seed Storage . . . . . 211  
*M. Murata*
- 11 Apomixis in Crop Plants—Cytogenetic Basis and Role in Plant  
Breeding . . . . . 229  
*W. W. Hanna*

### Section B—Cereals (and Millets)

- 12 Cytogenetics of Wheat and its Close Wild Relatives—*Triticum*  
and *Aegilops* . . . . . 243  
*P. K. Gupta*
- 13 Molecular Genetics of Wheat . . . . . 263  
*P. K. Gupta, I. Altosaar and D. K. Garg*
- 14 Alien Genetic Variation in Wheat Improvement . . . . . 291  
*A. K. M. R. Islam and K. W. Shepherd*
- 15 Chromosome Manipulations in *Secale* (Rye) . . . . . 313  
*F. J. Zeller and M.-C. Cermeño*
- 16 Cytogenetics of Triticale—A Man-Made Cereal . . . . . 335  
*P. K. Gupta and V. R. K. Reddy*
- 17 Chromosome Mapping by Means of Aneuploid Analysis in  
Barley . . . . . 361  
*T. Tsuchiya*
- 18 Chromosome Manipulations in Barley Breeding . . . . . 385  
*R. T. Ramage*
- 19 Production and Analysis of Chromosome Duplications in  
Barley . . . . . 401  
*A. Hagberg and P. Hagberg*
- 20 Interspecific Hybrids within the Genus *Hordeum* . . . . . 411  
*R. von Bothmer and N. Jacobsen*
- 21 Intergeneric Hybrids involving the Genus *Hordeum* . . . . . 433  
*G. Fedak*

|    |   |     |
|----|---|-----|
| 22 | The Chromosomes of <i>Avena</i> . . . . .   | 449 |
|    | <i>T. Rajhathy</i>  |     |
| 23 | The Cytogenetic Evolution of Triticeae Grasses . . . . .  | 469 |
|    | <i>S. Sakamoto</i>  |     |
| 24 | Cytogenetics of <i>Zea</i> and <i>Tripsacum</i> . . . . .   | 483 |
|    | <i>J. M. J. de Wet</i>  |     |
| 25 | Cytogenetic, Genetic and Plant Breeding Applications of <i>B-A</i><br>Translocations in Maize . . . . . | 493 |
|    | <i>J. B. Beckett</i>  |     |
| 26 | Chromosome Manipulations in Maize . . . . .   | 531 |
|    | <i>J. A. Birchler</i>   |     |
| 27 | Molecular Analysis of the Nucleolus Organizer Region in Maize . . . . .                                 | 561 |
|    | <i>M. D. McMullen, R. L. Phillips and I. Rubenstein</i>   |     |
| 28 | Chromosome Architecture and Aneuploidy in Rice . . . . .  | 577 |
|    | <i>G. S. Khush and R. J. Singh</i>  |     |
| 29 | Pearl Millet Cytogenetics . . . . .   | 599 |
|    | <i>J. L. Minocha</i>  |     |
| 30 | Cytogenetics of Minor Millets . . . . .   | 613 |
|    | <i>M. S. Chennaveeraiah and S. C. Hiremath</i>  |     |
|    | Index . . . . .   | 629 |
