

CONTENTS

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xiii</i>
1. The ABC of ABC Transporters	1
Baptiste Pierman, Marc Boutry, and François Lefèvre	
1. Structural and Enzymatic Properties	1
2. Substrates and Functions	5
3. Open Questions	13
References	15
2. Plant Aquaporins	25
Lionel Verdoucq and Christophe Maurel	
1. Introduction	26
2. Plant Aquaporin Diversity	27
3. Molecular Function and Regulation	36
4. Conclusion and Perspectives	45
References	46
Further Reading	56
3. Heavy Metal Pumps in Plants: Structure, Function and Origin	57
Jeppe Thulin Østerberg and Michael Palmgren	
1. Copper and Zinc Homeostasis in Eukaryotes	58
2. P-Type ATPases Are Primary Active Pumps Found in All Cells	59
3. P1B-Type ATPases in Plants	62
4. Mechanism of Pumping by P-Type ATPases	64
5. Structure and Mechanism of P1B ATPases	66
6. Function of the Terminal Metal Binding Domains	69
7. Classification of P1B ATPases	70
8. The Origin of P1B ATPases in Plants	71
9. The Origin of P1B-2 ATPases in Plants	75
10. Future Perspectives	80
References	80
Further Reading	88

4. Metal Transport in the Developing Plant Seed 91

Seckin Eroglu

1. General Principles in Plant Metal Homeostasis	92
2. Arabidopsis Seed Metal Homeostasis	95
3. Post-Phloem Metal Transport	96
4. From Seed Coat to the Endosperm, and Further to the Embryo	98
5. Metal Transport Within the Embryo	102
6. Do Tonoplast Transporters Control Metal Acquisition in the Embryo?	105
Acknowledgements	106
References	106

5. Transporters and Mechanisms of Hormone Transport in Arabidopsis 115

Rashed Abualia, Eva Benkova, and Benoît Lacombe

1. Introduction	116
2. Auxin	118
3. Cytokinins	124
4. Absciscic Acid (ABA)	125
5. Gibberellins (GA)	127
6. Jasmonates	129
7. Ethylene	130
8. Brassinosteroids	130
9. Strigolactones	131
10. Conclusion	131
Acknowledgements	132
References	132
Further Reading	138

6. Root Nitrate Uptake 139

Laurence Lejay and Alain Gojon

1. Introduction	139
2. Characterization of NO_3^- Transport Systems	141
3. Regulation of Root NO_3^- Acquisition	146
4. Nitrate Transporter-Based Strategies for Improving NUE in Crops	155
5. Conclusion	159
References	160

7. The Regulation of Ion Channels and Transporters in the Guard Cell	171
Brice Roux and Nathalie Leonhardt	
1. Introduction	172
2. Proton Pumps	175
3. K ⁺ Channels and Transporters	185
4. Anion Transport	190
5. Ca ²⁺ Transporters	196
6. Summary	198
Acknowledgement	198
References	199
8. The Pollen Plasma Membrane Permeome Converts Transmembrane Ion Transport Into Speed	215
Heidi Pertl-Obermeyer, Peter Lackner, John W.C. Dunlop, and Gerhard Obermeyer	
1. Introduction	216
2. The Pollen Permeome—Ion Transporter Classes Expressed in Pollen	217
3. Concerted Action of Ion Transport Leads to Spatial Self-organization and Drives Tube Growth	251
4. Conclusion	257
Acknowledgements	258
References	258
9. Xylem Ion Loading and Its Implications for Plant Abiotic Stress Tolerance	267
Tetsuya Ishikawa, Tracey Ann Cuin, Nadia Bazihizina, and Sergey Shabala	
1. Introduction	268
2. Essentiality of Xylem Ion Loading for Abiotic Stress Tolerance	268
3. The Molecular Identity of the Key Transport Systems Mediating Xylem Ion Loading	270
4. Stress-Induced Regulation of Xylem Ion Loading and Its Implications	278
5. Implications for Plant Breeding	289
Acknowledgements	290
References	290
Further Reading	300

10. The Role of Plant Transporters in Mycorrhizal Symbioses 303

Carmen Guerrero-Galán, Gabriella Houdinet, Monica Calvo-Polanco,
Katia E. Bonaldi, Kevin Garcia, and Sabine Dagmar Zimmermann

1. Introduction	304
2. Ectomycorrhizal Symbiosis Requires Tightly Regulated Plant Membrane Transport	306
3. Arbuscular Mycorrhizal Fungi Control Plant Ion Channels and Transporters	313
4. First Steps in the Study of Plant Nutrition in Orchid Mycorrhizae	325
5. Concluding Remarks and Perspectives	326
Acknowledgements	329
References	329
