1. Antimicrobial Resistance in *Campylobacter* Species: Mechanisms and Genomic Epidemiology

1

Chris A. Whitehouse, Shaohua Zhao, and Heather Tate

1. Introduction	2
2. Diversity of <i>Campylobacter</i> Species	3
3. Clinical Manifestations	6
4. Global Epidemiology of <i>Campylobacter</i> Infection	8
5. Treatment of Campylobacteriosis	12
6. Antimicrobial Resistance in <i>Campylobacter</i>	13
7. Antimicrobial Resistance Genes and Their Mechanisms of Action	24
8. Tracking Antimicrobial Resistance Using WGS	32
Acknowledgments	35
References	35

2. Microbial Source Tracking of *Cronobacter* spp.

49

Steve Forsythe

1. Introduction	50
2. Taxonomy of the <i>Cronobacter</i> Genus	53
3. Physiological Traits of <i>Cronobacter</i> With Relevance to Typing Methods	57
4. Sources of <i>Cronobacter</i> spp.	59
5. Isolation Methods	63
6. Identification Methods	64
7. Typing <i>Cronobacter</i> Isolates	69
8. Application of Conventional Typing Methods for <i>Cronobacter</i> Isolates	79
9. Whole-Genome Typing Methods	84
10. Conclusions	93
Acknowledgments	94
References	94
Further Reading	101

3. Modeling Bacteria–Phage Interactions and Its Implications for Phage Therapy	103
Saptarshi Sinha, Rajdeep K. Grewal, and Soumen Roy	
1. The Bacteria–Phage Interaction	104
2. Mathematical Modeling	115
3. Computer Simulations	124
4. Phage Bacteria Interaction Under Spatial Limitations	132
Acknowledgments	137
References	138
4. Bacterial Anaerobic Synthesis Gas (Syngas) and CO₂ + H₂ Fermentation	143
Frank R. Bengelsdorf, Matthias H. Beck, Catarina Erz, Sabrina Hoffmeister, Michael M. Karl, Peter Riegler, Steffen Wirth, Anja Poehlein, Dirk Weuster-Botz, and Peter Dürre	
1. Introduction	144
2. Metabolism of Acetogens	146
3. Natural Products of Acetogens	154
4. Taxonomy and Phylogeny of Acetogens	160
5. Brief Description of Selected Acetogens	175
6. Modeling, Proteomics, and Transcriptomics	183
7. Metabolic Engineering of Acetogens	186
8. Reactor Configuration and Fermentation Technology	194
9. Legislative Barriers	201
Acknowledgments	202
Author Contributions	202
References	202
5. Biofilm: A Hotspot for Emerging Bacterial Genotypes	223
Live L. Nesse and Roger Simm	
1. Introduction	224
2. Modification of Existing Genetic Information in Biofilm	228
3. HGT in Biofilm	233
4. Conclusion	240
References	241
