

Acknowledgments

VOLUNTEERS

This project benefited from the assistance of many volunteers ever since work began in 2012. The tasks undertaken were varied and often tedious, so we are most grateful for the attentive efforts of the following individuals: Alexandra Arseniev-Koehler, Holly Chan, Lacey Crow, Jim Duemmel, Kathi Erickson, Shambhavi Gautam, Virginia Hassinger, Douglas Houck, Jessie Johanson, Don Knoke, Adria Lau, Jane Lundin, Chase O'Neil, Susan Peterson, Rachel Price, Sandra Ruffner, Cindy Spurgeon, Sangeetha Sushil, Sherie Tan, and Ellen Van Wyk. The final version of this book was significantly improved through comments and suggestions on earlier drafts from Ed Alverson, Nuri Benet-Pierce, Heron Brae, Dick Brainerd, Howie Brounstein, Eric DeChaine, Wendy DesCamp, Markus Dillenberger, Jim Duemmel, Peter Dunwiddie, Mark Egger, Don Estberg, Jamie Fenneman, Peggy Hudson, Jeff Lesh, Frank Lomer, Bob Mathiasen, Dominic Maze, Timothy McNitt, Mare Nazaire, Guy Nesom, Nick Otting, Jenifer Parsons, Rich Rabeler, Mike Schock, and Thomas Stoughton.

Special thanks to the following individuals who generously agreed to copyedit sections of the galley proofs: Kathy Ahlenslager, Julia Bent, Tatiana Boyle, Jim Duemmel, Mark Darrach, Rick Dillhoff, Richard Easterly, Don Estberg, Walter Fertig, Romey Haberle, Cleveland Hall, Virginia Hassinger, Janka Hobbs, Russ Holmes, Peggy Hudson, Ray Izumi, Regina Johnson, Suzanne Joneson, Shannon Kimball, Terri Knoke, Sheryl McDevitt, Bridget McNassar, Scott Moore, Dan Paquette, Robert Pelant, Richard Ramsden, Debra Salstrom, Fayla Schwartz, Jim Smith, Mark Turner, Jeff Walker, Fred and Ann Weinmann, Dave Wilderman, Claire Wainwright, Gabe Wisswaesser, and Josh Wozniak. Thank you also to Ryan Huston for his thoroughness on pagination and indexing tasks.

SUPPORT STAFF

We were very fortunate to have the involvement of several dedicated and talented staff members over the course of this work, without whose efforts the revision of *Flora of the Pacific Northwest* would not have been possible. We thank the following for their work processing specimens, images, and related content: Roya Banan, Melissa Bowers, Alex Harkness, Robin Lauber, Pamela Maldonado, Morgan McGee, and Ibro Palovina. Special thanks to Melissa Bowers for her much-needed editorial work during the early phases of this project.

Funding for this project came from a number of sources, in a variety of forms, and supported multiple people with diverse associations with the University of Washington. Such an arrangement required flexibility and patience from the Burke Museum Fiscal and Development Offices. We are most grateful for the unquestioning support of Olga Davis, Phoebe Keleman, Sandy Marsden, and Hally Swift, who collectively kept the financial engine of this project running.

We are especially and most grateful to Maria Yousoufian and Sara Legler for exceeding all expectations with respect to doing the layout work for this project. Their commitment has been exemplary, central to the completion of this book, and will always be remembered. Finally, we thank Burke Museum executive director Julie Stein for her continuous encouragement and support for the Herbarium's work.

AUTHORS

The Pacific Northwest has an abundance of talented botanists. We leaned heavily on the knowledge, collegiality, and generosity of our peers in completing this book. Ed Alverson, Dick Brainerd, Mark Darrach, Peter Lesica, Nick Otting, Barbara Wilson, and Peter Zika contributed some of the most challenging treatments in the book, and we thank them for their thoroughness and expertise. It was a particular honor to have Noel Holmgren provide the *Penstemon* treatment, for he was a contributing author (*Castilleja*) in the original *Flora*. Peter Dunwiddie, Carolyn Ferguson, Alex Harkness, Susan Kephart, Mark Mayfield, Daniel McNair, Richard McNeill, Katie Sauter Messick, Richard G. Olmstead, Jim Reveal, Valerie Soza, Emma Tate, Jane Van Susteren, Genevieve Walden, Jeff Walker, and Barry Wendling are thanked for the treatments they authored. The authors of each family are provided below (genera listed in parentheses indicate specific contributions). Order of authors within a family reflects relative amount contributed.

ILLUSTRATORS

Without the assistance of Pat Holmgren and her colleagues at the New York Botanical Garden archives, we may never have gained permission to use the approximately 3,500 Jeanne Janish and 400 John Rumely illustrations that grace both the 1st edition and this revised version of *Flora*. This project began without a primary illustrator, but fortune shone upon us when our paths crossed with Crystal (Soojeong) Shin, who filled this role by completing 882 of the 1,382 new illustrations included here. We are grateful for Natsuko Porcino's steady involvement, through which she completed 214 illustrations, and we thank Linda Vorobik for the 111 illustrations that she completed for the project. We were fortunate to work with several other outstanding illustrators, whom we also

thank (number of illustrations indicated in parentheses): Barry Boone (3), Bianca Chavez (3), Amber Fiol (8), Laura Frick (1), Pat Lu-Irving (23), Angela Mele (17), Rachel Osborne (46), Charlotte Ricker (1), Sage Stowell (9), and Rachael Whitehead (47).

We thank the following illustrators and publications who generously allowed us to use their illustrations: Bobbi Angel (2; *Intermountain Flora*), Charlotte Hannan (1; *Bulletin of the Torrey Botanical Club*), Rebekah Hunter (1; *Aliso*), Jeanne R. Janish (2; *Intermountain Flora*), Terri Knoke (2; *Phytoneuron*), Charlotte Mentges (1; *Madrono*), and Linda Vorobik (1; *Journal of the Botanical Research Institute of Texas*).

UNIVERSITY OF WASHINGTON PRESS

Lorri Hagman deserves special thanks and praise for her support for this work, especially in the early stages when the logistical and funding details were still being worked out. Lorri always saw the importance of a revised *Flora*. Julie Van Pelt similarly deserves our undying gratitude for her support and patience in seeing this book through to completion. Julie kept us on task and showed remarkable patience for the unexpected obstacles we encountered in completing the initial and final drafts.

EDITORS' ACKNOWLEDGMENTS

David Giblin: I extend my deepest gratitude to my wife, Julie Monahan, for her support. The evening and weekend hours were among my most productive, and I appreciate the latitude you provided to pursue this interest. I owe my heartfelt thanks to Maria Yousoufian for her outstanding work in the Herbarium over the years, much of which supported this project.

Richard Olmstead: I would like to acknowledge David Giblin for his vision in thinking we could make this happen and then for convincing me that we could do it, Ben Legler for demonstrating that digital information could become a full-fledged *Flora*, and the many Herbarium and foray volunteers who contributed their time and resources directly or indirectly to the *Flora* project.
