

CONTENTS

Preface		vii
Chapter 1	The Functionally Discrete Biological Roles of the H1 Linker Histone Subtypes <i>Thomas G. Sourlingas</i>	1
Chapter 2	Linker Histones and Chromatin Structure <i>Chang-Hui Shen</i>	35
Chapter 3	The Linker Histone and Chromatin of Yeast <i>Saccharomyces Cerevisiae</i> <i>George Miloshev and Milena Georgieva</i>	59
Chapter 4	Histones in Metaphase Chromosomes <i>Susumu Uchiyama and Kiichi Fukui</i>	77
Chapter 5	Histone Modifications and Gene Activation <i>Roshini Nilupama Wimalaratna and Chang-Hui Shen</i>	89
Chapter 6	Histone Modifiers in Cereals <i>Aliki Kapazoglou, Dimitra Papaefthimiou and Athanasios Tsaftaris</i>	109
Chapter 7	Histone Phosphorylation and the Cell Division Cycle <i>Geoffrey Woodard</i>	137
Chapter 8	Basic Parameters for Plant Nuclei and 3D Localization of Histone Modification <i>Toshiyuki Wako and Kiichi Fukui</i>	153
Chapter 9	Histone Modification by Non-enzymatic Glycation and Preventive Strategies <i>Daniel Cervantes-Laurean and Gilbert A. Boissonneault</i>	163

Chapter 10	The Role of Chromatin in Inducible Gene Regulation in the Immune System	185
	<i>Lucy D. Apps and Adele F. Holloway</i>	
Chapter 11	The Chromatin Structure of Ribosomal DNA	201
	<i>Benoît Leblanc</i>	
Chapter 12	The Epigenome and its Therapeutic Potential in Breast Cancer	225
	<i>Virginia A. Spencer and Jimmie E. Fata</i>	
Index		245
