

Preface

This book aims to highlight the current researches and provides a platform to further the scope of innovations in this area. This book is a product of the combined efforts of many researchers and scientists, after going through thorough studies and analysis from different parts of the world. The objective of this book is to provide the readers with the latest information of the field.

Apoptosis refers to the procedure of programmed cell death (PCD). This book reflects the recent research studies on apoptosis in medicine. It provides an introduction of apoptosis to the uninitiated. It also discusses its applications in normal physiology during bone resorption under mechanical stress and deals with the analysis of apoptosis in a number of pathological conditions with special emphasis on cancer.

I would like to express my sincere thanks to the authors for their dedicated efforts in the completion of this book. I acknowledge the efforts of the publisher for providing constant support. Lastly, I would like to thank my family for their support in all academic endeavors.
