

PREFACE

The primary aim of writing this book is to provide students the principles of genetics in a condensed form. Even though it is not exhaustive in nature, it gives full coverage of the topic in simple English. This will be useful for the first year B.V. Sc. students as it covers second semester syllabus prescribed by Veterinary Council of India.

This book would never have been written without the support of my family. I thank my wife Susila, daughter Kaavya and my son Thrishanth for their support, encouragement and patience.

I convey my sincere thanks to Satish Serial Publishing House, New Delhi for publishing this book.

R. Thiagarajan
