

**At last: your chance to attain scientific literacy straight from the Science Masters.**

"The name Leakey is synonymous with the study of human origins," wrote the *New York Times* in describing the renowned family of paleontologists—Louis Leakey, Mary Leakey, and their son, Richard Leakey—whose fieldwork in East Africa over many decades has contributed so much to our understanding of human evolution. *The Origin of Humankind* is Richard Leakey's final statement on human evolution, answering the question: What made humans human?

"This book is a reliable and accessible source of information about the achievements of, and the challenges facing, those who study the biology of our ancestors. It is challenging without being intimidating."

—*The New Scientist*

"This is an exciting detective story, in which the clues are fossilized bones and stone tools created by our ancestors, complete with smoking guns and red herrings. . . . Leakey's prose is a pleasure to read and the tale he tells is spell-binding."

—*Hartford Courant*

RICHARD LEAKEY is the author of *People of the Lake*, *The Making of Mankind*, *One Life*, *Origins* and *Origins Reconsidered* (both with Roger Lewin), and *Conservation: Save the Elephants*.

**Future contributors to the Science Masters series:**

- Mary Catherine Bateson •William H. Calvin •Jared Diamond •Murray Gell-Mann
- Stephen Jay Gould •Susan Greenfield •Daniel Hillis •Steve Jones
- Lynn Margulis •Marvin Minsky •Steven Pinker •Stephen H. Schneider
- George Smoot
