

TOOLS FOR SUCCESS IN MICROBIOLOGY

Online Learning Center
www.mhhe.com/prescott5

These tools for success can be found in Prescott's Online Learning Center:

- BioCourse.com (a dynamic world where science comes to life!)
- Self-quizzing opportunities including multiple choice, true/false, and labeling questions
- Flash cards, web exercises, and case studies
- Careers in Microbiology weblinks

Plus, the Online Learning Center features a **FREE tutorial service** that allows students to e-mail questions to an online consultant and receive an answer within 24 hours!

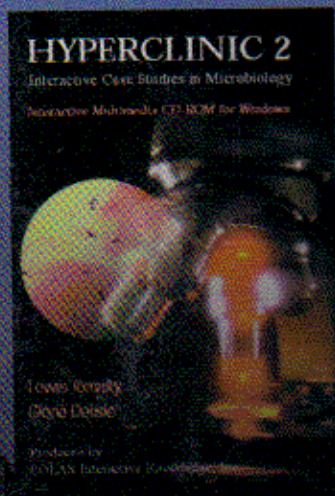

HyperClinic 2 CD-ROM

Tomalty/Delisle, Queen's University/Kingston General Hospital
ISBN 0-07-233312-4

Evaluate realistic case studies which include a patient history and description of signs and symptoms. Students can also analyze the results of physician-ordered clinical tests to reach a diagnosis. Medical students can evaluate a case study scenario and then decide which clinical samples should be taken and which diagnostic tests should be run.

More than 200 pathogens are profiled, 105 case studies presented, and 46 diagnostic tests covered.

Student Study Guide

Prepared by Linda Sherwood, Montana State University
ISBN 0-07-233336-7

The Student Study Guide provides a variety of problem-solving formats such as fill in the blank, matching, multiple choice, and true/false. This guide also provides students with overviews, objectives, and outlines for all chapters, as well as a guide for using *Microbes in Motion III* CD-ROM.
