

GO TO THE HEAD OF THE CLASS WITH

Lippincott's Illustrated Reviews: Biochemistry, Third Edition

Now in full color, *Lippincott's Illustrated Reviews: Biochemistry, Third Edition*, enables rapid review and assimilation of large amounts of complex information about the essentials of medical biochemistry. As in previous editions, *Lippincott's Illustrated Review: Biochemistry* features an outline format, over 600 illustrations, cross-references to other titles in the series and over 100 USMLE-style questions.

- ✓ Concept maps, a tool for visualizing the connections between concepts. Material is represented in a hierarchical fashion with the most inclusive, most general concepts at the top of the map, and the more specific, less general concepts arranged beneath.
- ✓ End of Chapter Summaries of the most important/clinically significant testable information on the USMLE Step 1 exam.
- ✓ A large chapter at the end of the main text that presents chapter summaries matched with key phrases that the students can use to self-test prior to a class examination or USMLE Step 1.

Students who are preparing for standard courses or examinations (USMLE, COMLEX, ECFMG) will find this remarkable work "must read" material to master biochemistry essentials.
