

Contents

Structural, Mechanistic and Genomic Insights into OCP-mediated Photoprotection

Cheryl A. Kerfeld and Diana Kirilovsky

Genomics of Salt Acclimation: Synthesis of Compatible Solutes among Cyanobacteria

Martin Hagemann

Iron in Cyanobacteria

Chana Krantzler, Mareike Rudolf, Nir Keren, Enrico Schleiff

Functional Genomics of Metalloregulators in Cyanobacteria

L. Botello-Morte, A. González, M. T. Bes, M. L. Peleato and M. F. Fillat

Genomics of the Pleiotropic Glutathione System in Cyanobacteria

Kinsley Narainsamy, Benoit Marteyn, Samer Sakr, Corinne Cassier-Chauvat and Franck Chauvat

A Genomic View of Secondary Metabolite Production in Cyanobacteria

Annick Méjean and Olivier Ploux

Assembly and Export of Extracellular Polymeric Substances (EPS) in Cyanobacteria: A Phylogenomic Approach

Sara B. Pereira, Rita Mota, Catarina L. Santos, Roberto De Philippis and Paula Tamagnini

Gene Expression During Heterocyst Differentiation

Antonia Herrero, Silvia Picossi & Enrique Flores

Cover Image: This figure highlights the most up-to-date knowledge, exposed by a team of international experts, on the essential faces of cyanobacteria, the fascinating microorganisms that colonize our planet and sustain a large part of the biosphere. Provided by Franck Chauvat & Corinne Cassier-Chauvat.
