

Advances in Virus Research—Volume 86

Edited by
Said A. Ghabrial

Cover illustration: Fungal partitivirus virion structures obtained by cryo-TEM and icosahedral 3-D image reconstruction (see Figure 2, chapter 3 by Nibert et al).

Courtesy of Max L. Nibert.

Contents

Viruses and Prions of *Saccharomyces cerevisiae*
Reed B. Wickner, Tsutomu Fujimura and Rosa Esteban

Multiplexed Interactions: Viruses of Endophytic Fungi
Xiaodong Bao and Marilyn J. Roossinck

3D Structures of Fungal Partitiviruses
Max L. Nibert, Jinghua Tang, Jiatao Xie, Aaron M. Collier, Said A. Ghabrial, Timothy S. Baker and Yizhi J. Tao

Chrysovirus Structure: Repeated Helical Core as Evidence of Gene Duplication
José R. Castón, Daniel Luque, Josué Gómez-Blanco and Said A. Ghabrial

Hypovirus Molecular Biology: From Koch's Postulates to Host Self-Recognition Genes that Restrict Virus Transmission
Angus L. Dawe and Donald L. Nuss

The Family *Narnaviridae*: Simplest of RNA Viruses
Bradley I. Hillman and Guohong Cai

Viruses of the White Root Rot Fungus, *Rosellinia necatrix*
Hideki Kondo, Satoko Kanematsu and Nobuhiro Suzuki

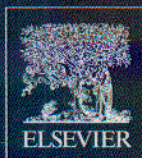

Viruses of the Plant Pathogenic Fungus *Sclerotinia sclerotiorum*
Daohong Jiang, Yanping Fu, Li Guoqing and Said A. Ghabrial

Viruses of Botrytis
Michael N. Pearson and Andrew M. Bailey

Insight into Mycoviruses Infecting *Fusarium* Species
Won Kyong Cho, Kyung-Mi Lee, Jisuk Yu, Moonil Son and Kook-Hyung Kim

Viruses of *Helminthosporium (Cochliobolus) victoriae*
Said A. Ghabrial, Sarah E. Dunn, Hua Li, Jiatao Xie and Timothy S. Baker

Phytophthora Viruses
Guohong Cai and Bradley I. Hillman
