

Contents

Fungal Genomics: Sequencing and Annotation

Alan Kuo, Brian Bushnell, and Igor V. Grigoriev

Exploring the Transcriptome of Mycorrhizal Interactions

Annegret Kohler and Emilie Tisserant

Evolutionary and Adaptive Role of Transposable Elements in Fungal Genomes

Jonathan Grandaubert, Marie-Helene Balesdent, and Thierry Rouxel

The Genomics of Powdery Mildew Fungi: Past Achievements, Present Status and Future Prospects

Stéphane Hacquard

Functional Genomics of Smut Fungi – From Genome Sequencing to Protein Function

Gunther Doehlemann, Jan Schirawski, and Jörg Kämper

Advancing Knowledge on Biology of Rust Fungi Through Genomics

Sébastien Duplessis, Guus Bakkeren, and Richard Hamelin

Truffle Phylogenomics: New Insights into Truffle Evolution and Truffle Life Cycle

Thibaut Payen, Claude Murat, and Gregory Bonito

The Natural Histories of Species and Their Genomes: Asymbiotic and Ectomycorrhizal *Amanita* Fungi

Jaqueline Hess and Anne Pringle

Genomics of Arbuscular Mycorrhizal Fungi: Out of the Shadows

Mathilde Malbreil, Emilie Tisserant, Francis Martin, and Christophe Roux

Genomes of Plant-Associated Clavicipitaceae

Christopher L. Schardl, Carolyn A. Young, Neil Moore, Nicholas Krom, Pierre-Yves Dupont, Juan Pan, Simona Florea, Jennifer S. Webb, Jolanta Jaromczyk, Jerzy W. Jaromczyk, Murray P. Cox, and Mark L. Farman

Genomics, Life-Styles and Future Prospects of Wood-Decay and Litter-Decomposing Basidiomycota

Taina K. Lundell, Miia R. Mäkelä, Ronald P. de Vries, and Kristiina S. Hildén

***Heterobasidion annosum* s.l. Genomics**

Mårten Lind, Jan Stenlid, and Åke Olson

Speciation Genomics of Fungal Plant Pathogens

Eva H. Stukenbrock

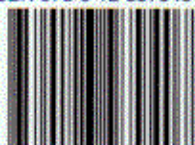

Cover Image: A poplar leaf colonised by the foliar rust fungus *Melampsora larici-populina*, Francis Martin
