

Contents

Whole Genome Sequencing of Fruit Tree Species

David Chagné

Forest Tree Genomics: Review of Progress

Geneviève J. Parent, Elie Raheison, Juliana Sena and John J. MacKay

Acceleration of Forest and Fruit Tree Domestication by Genomic Selection

Fikret Isik, Satish Kumar, Pedro J. Martínez-García, Hiroyoshi Iwata and Toshiya Yamamoto

Population and Conservation Genomics in Forest and Fruit Trees

Filippos A. Aravanopoulos, Ioannis Ganopoulos and Athanasios Tsaftaris

Genetics and Genomics of Tree Architecture

Evelyne Costes and Jean-Marc Gion

The Genetic Control of Bud-Break in Trees

Albert G. Abbott, Tatyana Zhebentyayeva, Abdelali Barakat and Zongrang Liu

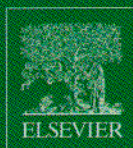

Tree Responses to Environmental Cues

Ingo Ensminger, Christine Yao-Yun Chang and Katharina Bräutigam

Molecular Signatures of Adaptation and Selection in Forest Trees

Juan P. Jaramillo-Correa, Julien Prunier, Alejandra Vázquez-Lobo, Stephen R. Keller and Alejandra Moreno-Letelier

Cover Image: Crown of beech trees in winter.
