

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 306

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Cell and Molecular Biology of DNA Methyltransferase 1
- Endothelial Progenitor Cells - Potential New Avenues to Improve Neoangiogenesis and Reendothelialization
- Interplay Between Spindle Architecture and Function
- Regulation of Cell Polarity and RNA Localization in Vertebrate Oocytes
- Insights into the Role of Cell-Cell Junctions in Physiology and Disease
- New Insights into the Role of BubR1 in Mitosis and Beyond
- Automated Methods for the Analysis of Skeletal Muscle Fiber Size and Metabolic Type
- Cell Biology of Chromerids: Autotrophic Relatives to Apicomplexan Parasites
- Contractile Vacuole Complex - Its Expanding Protein Inventory
