

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 303

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

“Should be on the shelf of any biomedical library”

DOODY’S

“Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library.”

THE NUCLEUS

Contents include

- Control of Actin Dynamics by Allosteric Regulation of Actin Binding Proteins
- Dynamics and Regulation of Epithelial Adherens Junctions: Recent Discoveries and Controversies
- Regulation of Cilium Length and Intraflagellar Transport
- Cellular and Molecular Biology of Airway Mucins
- Extracellular Hsp90 (eHsp90) as the actual target in clinical trials: Intentionally or unintentionally
- New Insights into the Mechanism for Chromosome Alignment in Metaphase
- New Insights into the Developmental Mechanisms of Coronary Vessels and Epicardium
- New Insights into Roles of Tubulobulbar Complexes in Sperm Release and Turnover of Blood-Testis Barrier
- Role of microRNA-138 as a Potential Tumor Suppressor in Head and Neck Squamous Cell Carcinoma
