

INTERNATIONAL  
REVIEW OF CELL AND  
MOLECULAR BIOLOGY

Volume 305

Edited by

KWANG W. JEON

*University of Tennessee, Knoxville, TN, U.S.A.*

**International Review of Cell and Molecular Biology** presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

*Praise for the Series*

"Should be on the shelf of any biomedical library"

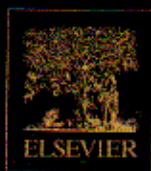

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

*Contents include*

- New Insights into Adhesion Signaling in Bone Formation
- New Insights into Roles of Acidocalcisomes and Contractile Vacuole Complex in Osmoregulation in Protists
- Functional Roles of Histone Modification, Chromatin Remodeling and MicroRNAs in *Arabidopsis* Flower Development
- Thy-1-Interacting Molecules and Cellular Signaling in *Cis* and *Trans*
- Discovery of Survivin Inhibitors and Beyond: FL118 as a Proof of Concept
- New Insights into the Dynamics of Plant Cell Nuclei and Chromosomes
- Role of Cyclin B1 Levels in DNA Damage and DNA Damage-Induced Senescence
- Transcription Factors in Alkaloid Biosynthesis
- New Insights into the Transport Mechanisms in Plant Vacuoles
