

Contents

Not Just Sweet Talkers: How Roots Stimulate Their Colonization by Beneficial Bacteria

Pascale B. Beauregard

Molecular Patterns of Rhizobacteria Involved in Plant Immunity Elicitation

Martin Mariutto and Marc Ongena

Root Microbiome Assemblage is Modulated by Plant Host Factors

Venkatachalam Lakshmanan

PGPR Interaction: An Eco friendly Approach Promoting the Sustainable Agriculture System

Usha Bishnoi

Human Pathogen-Plant Interactions: Concerns for Food Safety

Sarah M. Markland and Kalmia E. Kniel

Early Responses in the Root-rhizobia Interaction

Oswaldo Valdés-López and Georgina Hernández

The Implications of Polyploidy for the Evolution of Signalling in Rhizobial Nodulation Symbiosis

Adrian F. Powell and Jeff J. Doyle

Plant Cues and Factors Influencing the Behaviour of Beneficial Nematodes as a Belowground Indirect Defense

Jared Gregory Ali and Elizabeth Davidson-Lowe

Forest Canopy Precipitation Partitioning: An Important Plant Trait Influencing the Spatial Structure of the Symbiotic Soil Microbial Community

Carl L. Rosier, Leslie Dean Moore, Tiehang Wu and John T. Van Stan

Soluble and Volatile Metabolites of Plant Role and Practical Applications in Inhibit Systemic Resistance (ISR)

Gul Shad Ali, David Norman and Ashraf S.

Flying Whispers of Inter-kingdom Conve Plant and Bacterial Volatile Signals

Gopinath Selvaraj
