

The Rat Nervous System

SECOND EDITION

Edited by

George Paxinos

University of New South Wales, Sydney, Australia

The Rat Nervous System provides an exhaustive description of the cytoarchitecture, chemoarchitecture, and connectivity of the rat nervous system. In addition it offers updated and supplemented information on the following systems: peripheral motor, peripheral somatosensor, vascular, central motor, pain, and additional neurotransmitter systems.

Key Features

- Acclaimed First Edition is now completely revised in a single, fully comprehensive volume
- Established and expert editor
- Authoritative contributors
- More than 400 accurately constructed illustrations
- Clarity of presentation allows for use not only as a reference but also as a graduate-level resource
- Paxinos' other works include *The Rat Brain in Stereotaxic Coordinates*: a classic, the second most cited book in science
