

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 308

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Structure and Function of POTRA Domains of Omp85/TPS Superfamily
- Molecular Cell Biology and Immunobiology Of Mammalian Rod/Ring Structures
- Modulation of Glycan Recognition by Clustered Saccharide Patches
- New Insight into the Molecular Mechanisms of Mitosis and Cytokinesis in Trypanosomes
- Reprogramming and Carcinogenesis - Parallels and Distinctions
- New Insights into Functions, Regulation, and Pathological Roles of Tight Junctions in Kidney Tubular Epithelium
- Making of a Retinal Cell: Insights into Retinal Cell-Fate Determination
- Adhesion Networks of Cnidarians: A Postgenomic View
