

Volume 88

Advances in GENETICS

Serial Editors

Theodore Friedmann

University of California at San Diego, School of Medicine, USA

Jay Dunlap

The Geisel School of Medicine at Dartmouth, Hanover, NH, USA

Stephen Goodwin

University of Oxford, Oxford, UK

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- Non-Viral Vectors: We Have Come a Long Way
- Lipid Nanoparticles for Gene Delivery
- Nanotechnology for *In vivo* Targeted siRNA Delivery
- Lipid Nanoparticles for Short Interfering RNA Delivery
- Composite Nanoparticles for Gene Delivery
- Multifunctional Enveloped Nanodevices (MENDs)
- Lipid-Coated Calcium Phosphate Nanoparticles for Nonviral Gene Therapy
- Polymers for Nucleic Acid Transfer – An Overview
- Recent Developments in Nucleic Acid Delivery with Polyethylenimines
- Bioresponsive Polymer-Based Nucleic Acid Carriers
- Chitosan-Based Nanoparticles for Mucosal Delivery of RNAi Therapeutics
- Polycation-Mediated Integrated Cell Death Processes

Praise for Advances in Genetics:

"Outstanding both in variety and in the quality of its contributions." —

NATURE

"Can be highly recommended to geneticists, and biologists in general."

"will prove to be of high importance for the development of the science of genetics." —
