

Volume 87

Advances in GENETICS

Serial Editors

Theodore Friedmann

University of California at San Diego, School of Medicine, USA

Jay C. Dunlap

Dartmouth Medical School, Hanover, NH, USA

Stephen F. Goodwin

University of Oxford, Oxford, UK

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- Opportunity for Selection in Human Health
- Clinical Applications Involving CNS Gene Transfer
- Methods for Gene Transfer to the Central Nervous System
- The Filamentous Fungus *Sordaria Macrospora* as a Genetic Model to Study Fruiting Body Development
- The Genetics of Alzheimer's Disease

Praise for **Advances in Genetics**:

"Outstanding both in variety and in the quality of its contributions."—

NATURE

"Can be highly recommended to geneticists, and biologists in general..

will prove to be of high importance for the development of the science of genetics."—
