

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 313

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology — both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Lipidomics Applications for Discovering Biomarkers of Diseases in Clinical Chemistry
- Enzymatically Synthesized Inorganic Polymers as Morphogenetically Active Bone Scaffolds: Application in Regenerative Medicine
- New Insights into the Mechanism for VACM-1/cul5 Expression in Vascular Tissue *in vivo*
- The UNC-45 Myosin Chaperone: From Worms to Flies to Vertebrates
- Cell and Molecular Biology of Epidermal Growth Factor Receptor
- Centrosomes and the Art of Mitotic Spindle Maintenance
- Dual Roles of Orphan Nuclear Receptor TR3/Nur77/NGFI-B in Mediating Cell Survival and Apoptosis
