

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 312

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Microtubule Organization and Microtubule-Associated Proteins in Plant Cells
- β -Catenin in Pluripotency: Adhering to Self-Renewal or WNTing to Differentiate?
- Recent Advances in Molecular and Cell Biology of Testicular Germ-Cell Tumors
- New Insight into the Origin of IgG-Bearing Cells in the Bursa of Fabricius
- Biological Mechanisms Determining the Success of RNA Interference in Insects
- Canonical and Non Canonical Roles of Par-1/MARK Kinases in Cell Migration
- Insights into the Mechanism for Dictating Polarity in Migrating T-Cells
