

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 311

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Neuropeptides, Trophic Factors, and Other Substances Providing Morphofunctional and Metabolic Protection in Experimental Models of Diabetic Retinopathy
- Stereological and Allometric Studies on Neurons and Axo-Dendritic Synapses in Superior Cervical Ganglia
- New Insight into the Regulation of Floral Morphogenesis
- New Insight into Role of Myosin Motors for Activation of RNA Polymerases
- New Insights into the Metabolic and Molecular Mechanism of Plant Response to Anaerobiosis
- Beyond Expectations: Novel Insights into Epidermal Keratin Function and Regulation
- Characean Internodal Cells as a Model System for the Study of Cell Organization
