

Volume 86

Advances in GENETICS

Serial Editors

Theodore Friedmann

University of California at San Diego, School of Medicine, USA

Jay C. Dunlap

The Geisel School of Medicine at Dartmouth, Hanover, NH, USA

Stephen F. Goodwin

University of Oxford, Oxford, UK

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- Genomic Imprinting in Plants: What Makes the Functions of Paternal and Maternal Genes Different in Endosperm Formation?
- MicroRNAs and the Epigenetics in Adult Neurogenesis
- An Epigenetic Switch of the Brain Sex as a Basis of Gendered Behavior in *Drosophila*
- Neural Transposition in the *Drosophila* Brain: Is it all Bad News?
- Fine-Tuning Notes in the Behavioral Symphony: Parent-of-origin Allelic Gene Expression in the Brain
- Influencing the Social Group: The Role of Imprinted Genes
- The Potential Role of SHY in Epigenetic Gene Regulation During Brain Sexual Differentiation in Mammals
- The Biological Basis of Human Sexual Orientation: Is there a Role for Epigenetics?
- Repetitive Elements and Epigenetic Marks in Behavior and Psychiatric Diseases
- Epigenetic Modifications Underlying Symbiotic-Host Interactions
- Integrating Early Life Experience, Gene Expression, Brain Development: Unraveling the Thread of Nature via Nurture

Praise for *Advances in Genetics*:

"Outstanding both in variety and in the quality of its contributions."

"Can be highly recommended to geneticists, and biologists in general."

will prove to be of high importance for the development of the science of genetics." — SCIENCE
