

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 309

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Mouse Primordial Germ Cells: A Reappraisal
- Microtubule Plus-End Tracking Proteins and Their Roles in Cell Division
- Unicellular Eukaryotes as Models in Cell and Molecular Biology:
Critical Appraisal of Their Past and Future Value
- Genetic Mechanisms of Allopolyploid Speciation Through Hybrid Genome Doubling:
Novel Insights from Wheat (*Triticum* and *Aegilops*) Studies
- New Insights Into the Role of Plg-R_{CT} in Macrophage Recruitment
- ATP-Binding Cassette and Multidrug and Toxic Compound Extrusion Transporters
in Plants: A Common Theme Among Diverse Detoxification Mechanisms
- Role of p-21 Activated Kinases in Cancer Progression
