

Table of Contents

Foreword

Gene E. Robinson

Introduction to Advances in Insect Physiology: Genomics, Physiology and Behaviour of Social Insects

Amro Zayed and Clement F. Kent

Old Threads Make New Tapestry – Rewiring of Signalling Pathways Underlies Caste Phenotypic Plasticity in the Honey Bee, *Apis mellifera* L.

Klaus Hartfelder, Karina R. Guidugli-Lazzarini, Mario S. Cervoni, Douglas E. Santos and Fernanda C. Humann

The Physiological and Genomic Bases of Bumble Bee Social Behaviour

Etya Amsalem, Christina M. Grozinger, Mario Padilla and Abraham Hefetz

Physiological and Genomic Mechanisms of Social Organization in Wasps (Family: Vespidae)

Jennifer M. Jandt and Amy L. Toth

Juvenile Hormone: A Central Regulator of Termite Caste Polyphenism

Judith Korb

The Physiology and Genomics of Social Transitions in Aphids

Patrick Abbot

Insect Reward Systems: Comparing Flies and Bees

Eirik Søvik, Clint J. Perry and Andrew B. Barron

Epigenetics in Social Insects

Karl M. Glastad, Linh M. Chau and Michael A. D. Goodisman

The Molecular and Evolutionary Genetic Implications of Being Truly Social for the Social Insects

Timothy A. Linksvayer

Population Genomic and Phylogenomic Insights into the Evolution of Physiology and Behaviour in Social Insects

Clement F. Kent and Amro Zayed

Understanding Honey Bee Worker Self-Sacrifice: A Conceptual-Empirical Framework

Emma K. Mullen and Graham J. Thompson

Honey bee workers nurse their young sisters developing as larva.
Photo by Amro Zayed.
