

Advances in Virus Research – Volume 93

Edited by

Margaret Kielian, Karl Maramorosch and Thomas C. Mettenleiter

Cover illustration: Basic features of pestiviruses. Courtesy of the Friedrich-Loeffler-Institut.

Contents

Bean Common Mosaic Virus and Bean Common Mosaic Necrosis Virus: Relationships, Biology and Prospects for Control

Elizabeth A. Worrall, Francis O. Wamunja, Gerardine Mukeshimana, Jagger J.W. Harvey, John P. Carr and Neena Mitter

The Molecular Biology of Pestiviruses

Norbert Tautz, Birke Andrea Tews and Gregor Meyers

Cyprinid Herpesvirus 3: An Archetype of Fish Alloherpesviruses

Maxime Boutier, Maygane Ronsmans, Krzysztof Rakus, Joanna Jazowiecka-Rakus, Catherine Vancsok, Léa Morvan, Ma. Michelle D. Peñaranda, David M. Stone, Keith Way, Steven J. van Beurden, Andrew J. Davison and Alain Vanderplasschen

Human Immunodeficiency Virus Type 1 Cellular Entry and Exit in the T-Lymphocytic and Monocytic Compartments: Mechanisms and Target Opportunities During Viral Disease

Benjamas Aiamkitsumrit, Neil T. Sullivan, Michael R. Nonnemacher, Vanessa Pirrone and Brian Wigdahl
