

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 320

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, USA

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- New Insight into the Mechanism and Function of Autophagy in Plant Cells
- Ribosomal Protein S6 Phosphorylation: Four Decades of Research
- Different Pathways to the Lysosome: Sorting out Alternatives
- Intracellular Dynamics of Synucleins: "Here, There and Everywhere"
- Nuclear Pore Complexes and Nucleocytoplasmic Transport: From Structure to Function to Disease
- Cavin Family: New Players in the Biology of Caveolae
