

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 317

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology — both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library."

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Oxidative Stress, Unfolded Protein Response, and Apoptosis in Developmental Toxicity
- New Insights into the Organization of Plasma Membrane and Its Role in Signal Transduction
- Regulators of G-Proteins- Signaling Proteins- Negative Modulators of G-Protein- Coupled Receptor Signaling
- New Insights into the Role of Podoplanin in Epithelial-Mesenchymal Transition
- Microtubule-Depolymerizing Kinesins in the Regulation of Assembly, Disassembly, and Length of Cilia and Flagella
- Nuclear Envelope and Chromatin, Lock and Key of Genome Integrity
- Role of Ocr1 in Primary Cilia Assembly
