

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 316

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology — both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Comparative Biology of the Pentraxin Protein Family: Evolutionarily Conserved Component of Innate Immune System
- New Insights into the Role of Ficolins in the Lectin Pathway of Innate Immunity
- Leguminous Plants: Inventors of Root Nodules to Accommodate Symbiotic Bacteria
- New Insights into the Mechanisms of Mammalian Erythroid Chromatin Condensation and Enucleation
- Store-Operated Calcium Entry: Unveiling the Calcium Handling Signalplex
- Endoplasmic Reticulum Stress Signaling in Mammalian Oocytes and Embryos: Life in Balance
- Molecular, Cellular, and Physiological Significance of N-Terminal Acetylation
